INSIGNIA

QUICK SETUP GUIDE

RGB LED Light Strip

NS-PCG6RGB18

PACKAGE CONTENTS

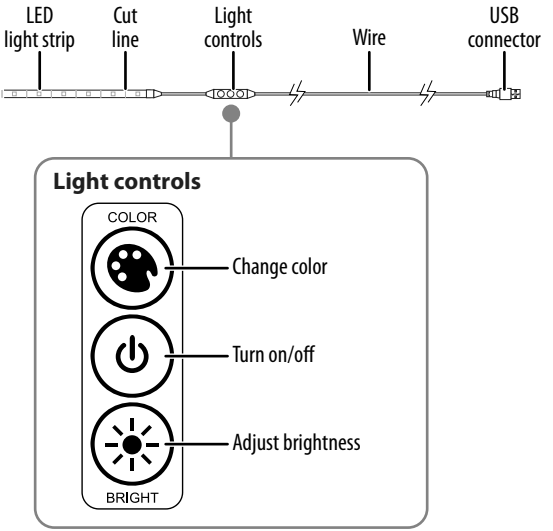
- LED light strip
- Double-sided tape
- *Quick Setup Guide*

FEATURES

- Premium LEDs produce 20 selectable colors
- Multi-step dimmer adjusts to the brightness level you want
- Self-adhesive backing attaches to monitors, computers, TVs, desks, or other spaces for quick, custom lighting
- Reduces eye strain from monitors or TV's while enhancing image contrast
- Lights powered through USB (on your computer or TV) or with a USB power adapter (not included)

Do not plug in your lights when they are coiled. This can generate excess heat which can damage the product or connected device.

Before using your new product, please read these instructions to prevent any damage.

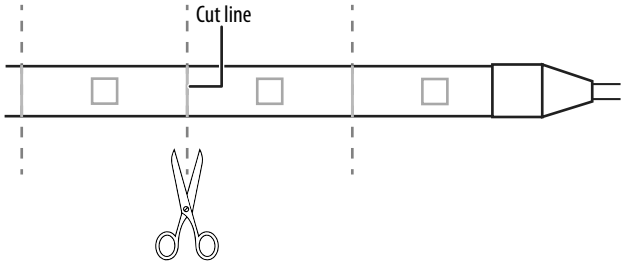


USING YOUR TAPE LIGHT

Shortening your tape light

- Use a pair of scissors to cut on a cut line. Cut lines are about 1.3 in. (3.3 cm) apart.

  Warning: Do not cut the silver solder markings. Only cut in the center of the copper-colored pads, as shown.



Attaching your lights

1. Peel the adhesive backing off the lights, then adhere the lights where you want them.
2. **Optional:** Attach the double-sided tape to the back of the light control, then adhere it where you want it.

Connecting to power

- Place the light strip where you want it, then connect the USB connector to your TV, computer, or other USB power source.

Notes:

- Make sure that the light strip is unrolled, otherwise it can damage the light strip or cause a fire.
- Every surface is different, and additional adhesive may be used if the LED tape detaches from the surface. Small pieces of clear tape can be used.

Adjusting the lights

Note: If you turn off or unplug your light strip, it will remember your last brightness and color settings.

- Press (power) to turn the light strip on and off.
- Press (COLOR) repeatedly to change the color combination. There are 20 available colors.
- Press (BRIGHT) repeatedly to adjust the brightness. There are eight light levels.

SPECIFICATIONS

- Input: 5V DC, 1A
- USB power supply (not included): 5V DC, 0.5A minimum (1A or more recommended)
- Length: 6.5 ft. (1.9 m)

TROUBLESHOOTING

LEDs will not turn on.

- Press the power button to make sure that your light is turned on, then press (BRIGHT) to increase the brightness.
- Make sure that your lights are connected to a working USB port or power outlet. If connected to a computer, turn on your computer.

LEDs flicker or turn on and off.

- Make sure that your lights are plugged into a working power outlet or USB port. Try plugging into a different power source.
- Make sure that the cable is not damaged.

SAFETY INFORMATION

- To avoid damage to the light strip, do not sharply twist or bend the light strip 90°.
- Do not cut the silver solder markings. Only cut in the center of the copper-colored pads.
