## CPU Wall Mount Bracket

SIMPLIFY YOUR WORKSPACE

This vertical CPU mount is a great solution if you are looking to free up some space underneath, or on top of your desk. Use this extra room for other work essentials, and have easy access to them since you have more space!

The width of this PC wall mount is adjustable between 4.75 to 8.75 inches, allowing it to accommodate most desktop computer CPUs. Find a space that is out of the way, and feel comfortable knowing that your CPU won't budge once it is secured in this wall mount.

The computer tower wall mount will easily attach to a flat surface such as a wall or under a desk. Once it is mounted, you'll be able to access it as often as you need and with ease since it won't be tucked away on the ground.

Keep your computer case elevated in a computer wall mount to prevent it from incurring damage from accidental kicking, and from dust and debris that can gather on the ground. Use this to keep your equipment working great for years to come.

- Space saving CPU wall mount bracket
- Versatile computer tower mount
- Mount to flat surfaces
- Protects your computer
- Sturdy materials

**HEALTHY LIFESTYLE.** Turn your workspace into an ergonomic environment.

**DESIGN.** Maximize your space's appeal and functionality.

**EASY INSTALLATION.** Simple assembly.
