

Manual for Rear Camera

Here's how to connect an aftermarket camera:

- 1) Red cable ① is connected to the backup light "+"
- 2) Black cable ② is connected to the "GND"
- 3) The reversing detection cable ④ (Brown cable comes from the 16PIN black power plug) is connected to the red cable ③ which extending from the camera's video input cable
- 4) red cable ⑤ which extending from the camera's video input cable, no connection required

Please refer to the picture for connection examples.

Warm reminder: Brown cable comes from the 16PIN black power plug, "No need to cut the cable", "No need to cut the cable", just tear a little of the plastic of the cable, just touch the cable with the copper wire inside and connected together.
