# Norton Core™

Secure WiFi Router

## Built to perform

Core's amazing coverage and speed means you can stream to your heart's content—from any room in your home<sup>1</sup>—while keeping your connected home network secure.

## Control like never before

### Network Performance

Instantly run network speed tests to ensure you are getting blazing fast WiFi.

### Device Discovery

Core knows things – the Internet of Things. It recognizes your smart devices automatically.

### Easy to setup and use

Norton Core's mobile app gets you set up with just a few taps and swipes.

### Give your favorite device the bandwidth it deserves

Prioritize any device in your home to receive maximum bandwidth with a touch of a button.

### Guest Access

Have friends over and share WiFi easily with secure guest access. Even set the duration of how long they can use it.

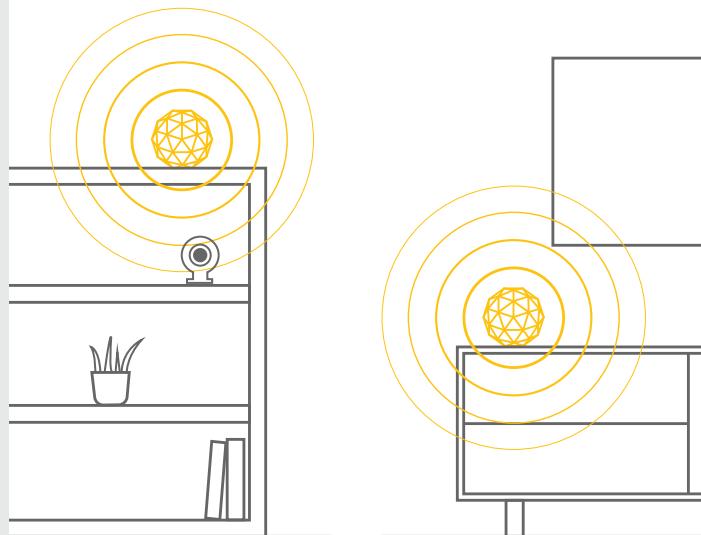

### Lights Out

Easily set and manage bedtime. So once the Internet goes to bed, your kids will too.

## The safest home network now starts with a secure router

Today's WiFi routers are vulnerable to cyber attacks. Norton Core™ fundamentally changes the equation – a wireless router that secures your connected home, fending off cyber-threats before they can infiltrate your home and compromise your personal life.

From scanning and monitoring every network packet to data encryption to automatic software updates, Core is now at the center of your connected home that builds a fortress around your home.

<sup>1</sup>Depending on the size of your home.

## Welcome to the Internet of (safe) things

All it takes is one compromised baby monitor or smart thermostat for cybercriminals to infiltrate your network and reach your personal data. Core discovers smart devices, identifies vulnerabilities and quarantines them.

## Introducing Security Score

Now there is an easier way to know how safe and secure your network is. With Security Score, you instantly gain insights on how to improve your network's security and block threats.
