

Polaroid PD-S53H Dash Cam

Driving safely is living safely. As there are more vehicles added on the road, driving becomes more dangerous and unsafe for all motorists. Drive safely with security and peace of mind with PD-S53H. The PD-S53H, with its compact size and attractive design provides FULL 1080P video quality, Parking Guard function, 120 degree wide angle lens, audio recording capability, lithium-polymer rechargeable battery, allowing up to 32 GB MicroSD Card for continuous recording and ease of use. Whether you need that credible eye witness in your vehicle to capture that unforeseen and unexpected accident, a reckless driver or capturing an interesting and attractive sighting, PD-S53H will be your credible Dash Cam to record the scene.

Features

High Definition, FULL 1080P HD video recording

Capture clear and crisp recording with FULL high-definition HD video quality. PD-S53H is compatible with micro-SDHC memory card up to 32GB with a requirement of class 6 or greater.

Ease of use and installation

The PD-S53H is extremely easy to use with a very simple installation process. The product is equipped with a flexible mounting bracket and a car charger and an extra long power cord that would allow for mounting in multiple locations in the vehicle. The on/off bracket makes for a quick install.

The PD-S53H automatically turns on when the power socket is tied to the ignition switch when the vehicle starts. Conversely, when the vehicle is shut off, the unit stops recording and automatically powers off.

Compact size with a high quality LED display

Enjoy vivid and clear high definition video quality on the 2.0" color

LED display. The ultra wide angle 120 degree allows for a wide coverage to capture the critical elements. The PD-S53H with its compact size is perfect to carry and mount any location of the vehicle.

Automatic collision detection and Parking Guard

PD-S53H's emergency recording gets automatically triggered in the event of an accident and the video recordings are dated and time stamped. Additionally, the video recording is protected from loop recording overwrites. The Parking Guard mode is an impact monitoring feature used to protect your vehicle from hit-and-run incidents when the ignition is off.

Continuous/Loop recording

Loop recording is a technology that allows for continuous video recording by replacing the old recorded video with the new file. This technology provides the user to select the desired length of video clips (2, 3 or 5 mins) to the installed micro SDHC card.
