

COLOR -CHANGE

- Cold color change will start at approximately 59°F (15°C), but best results occur if the ice water is chilled to approximately 32°F (0°C) or colder.
- Warm water color change will start at approximately 100.4°F (38°C), but best results occur if the water is approximately 104°F (40°C).
- Do not place the character in extremely hot water (over 109.4°F/43°C).
- Color change will only work on certain parts of the character's body or accessories. Not all included accessories change color.
- If color change does not work properly or quickly, the temperature of the character's body may be too close to the temperature of the water.
- Color change temperatures may vary according to weather conditions.
- The color-change effect has a lengthy, but limited lifespan.
- Do not store the character in direct sunlight for extended periods of time.
- Exposure to sunlight may deactivate color change feature.

*** ⚠ WARNING**
An adult must be present and supervise when placing the character in warm water, as the water may be hot.
