

OSCILLATING CERAMIC TOWER HEATER With ELECTRONIC CONTROL

Model 5521

Let the Remote Control Ceramic Tower Heater insulate you from the cold winter months ahead! The efficient vertical design and oscillation action will turn most chilly rooms or offices into a place of warmth and comfort. Easy-to-read digital controls on top of the heater make it simple to find the setting you desire. A convenient multifunctional remote control, in addition, gives you the option to change settings without moving from your desk or couch. A programmable thermostat, two quiet comfort settings, and an energy-saving eight-hour timer allow you to make adjustments to achieve optimal comfort.

- Multi-Function Remote control (Batteries included)
