

HDK001X

RADIO REPLACEMENT KIT

Product Description

PAC makes it possible for Harley-Davidson motorcycle enthusiasts to easily integrate an aftermarket radio into their ride with the HDK001K Radio Replacement Kit. The complete solution kit is designed for select 1998-2013 Harley's (FL models with factory fairings) and includes a pre-programmed interface to retain the factory handle bar audio controls, pre-wired installation harness, two options of frames for the aftermarket radio installation, and step-by-step instructions.

FEATURES

- Complete radio replacement solution
- Retains handle-bar audio controls
- Pre-programmed radio specific handle bar functions
- Pre-wired installation harness
- Two options for dash kit installation, with and without hinged tinted/UV protective cover)
- Step-by-step instruction manual

COMPETITIVE EDGE

The HDK001X is the best and simplest way to update the factory radio of select Harley-Davidson motorcycles. The kit provides everything needed to quickly install an aftermarket radio while retaining all the controls integrated into the handle-bar. The kit enables two ways to trim the headunit, with a hinged tinted UV cover to protect the new radio from the elements or without the cover to fully expose the front of the headunit.

BENEFITS FOR THE INSTALLER

Like all PAC products, the HDK001X simplifies the installation process by including a pre-wired harness ensuring out of the box compatibility that significantly reduces install time. The interface is pre-programmed to work with the bike's handle-bar controls and the headunit (compatible with major brands such as Alpine, Kenwood, Pioneer, Sony, etc.) further accelerating the installation process.

BENEFITS FOR THE END USER

Users will continue to experience the same controllability of their newly added aftermarket headunit through the built-in OE handle-bar controls. They can choose between two types of frames for their headunit installation, a conventional trim with the face of the radio exposed and a trim with a hinged tinted door that protects the radio from the harsh outdoor elements.

APPLICATIONS

Compatible with select 1998-2013 Harley-Davidson motorcycles with fairings
