Our Smart Home Activation services ensure your owners can make the most of their connected home.

Once your home owners have moved in, our Geek Squad® Agents will activate and customize their smart home tech, ensuring it works just as they expected.

Here's how our Smart Home Activation works:

1: Install smart home tech.

Your builder team installs pre-close smart home technology.

2: Close on home.

Your customer closes on their home and prepares to move in.

3: Contact info to Best Buy®.

You provide your new homeowner contact information to Best Buy.

4: We ship their smart home kit.

This kit can include post-close smart tech like wireless routers, smart speakers, video cameras and more.

5: Schedule.

Your homeowner calls our Geek Squad installation team to schedule their complimentary smart home activation.

6: Smart home activation.

A Geek Squad Agent installs, activates and teaches your homeowner about their smart tech, ensuring they're fully up and running.

Our team will ensure your new homeowner can make the most of their new smart home so you can move on to your next build.
