BLUETOOTH-ENABLED BIKE LOCK

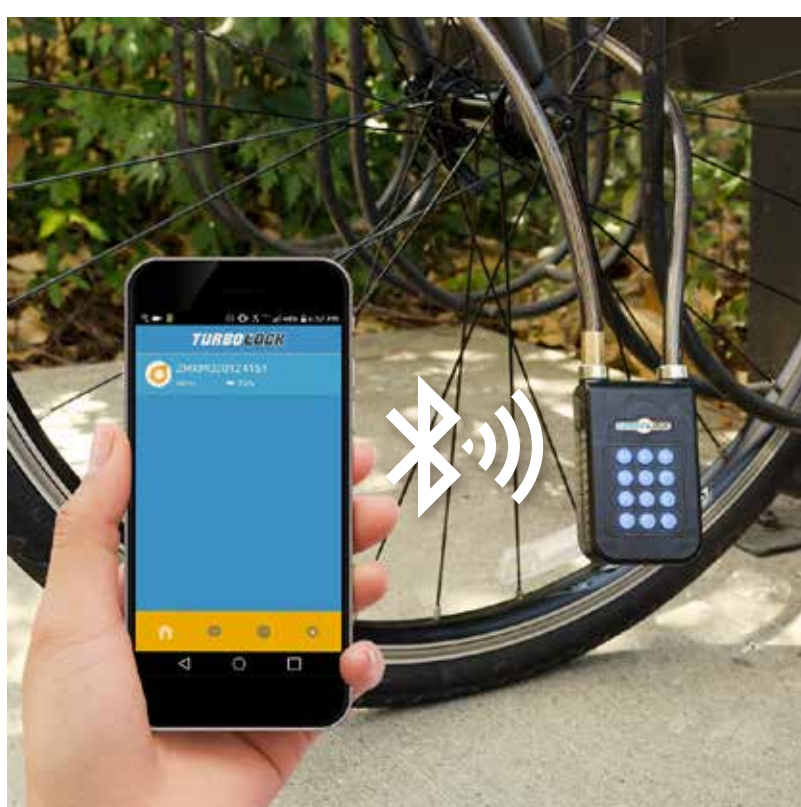

**Lock up your bicycle and experience peace of mind with the TurboLock TL-400KBL Keyless Bike Lock.**

No more worrying about missing keys or flimsy lock cables! With the TL-400KBL, this smart bike lock uses Bluetooth® connectivity to easily pair with your smart phone and TurboLock app so that it remotely locks and unlocks within a 33 ft. radius. Simply pair it, lock it, and forget it!

At only 0.5 lbs, the TL-400KBL bicycle lock comes with a 30.25 inch heavy-duty steel chain with a 10 mm diameter and 1.25 inch circumference to deter thieves and to keep your bike safe and secured. Its IP65 top rating means that this weather proof bicycle lock can protect your security lock through rain or shine! Whether you are in class all day or on vacation for an entire month, this Bluetooth bike lock will not disappoint.

But the TurboLock security lock doesn't just have to keep you safe! Use the TurboLock app to share this app enabled bike lock with family and friends, and send on-demand time sensitive codes of up to 5 digits. The TL-400KBL features high-end security, app control, and social sharing all packed in one casing, making this the best bike lock for you.

**Bluetooth Connectivity**

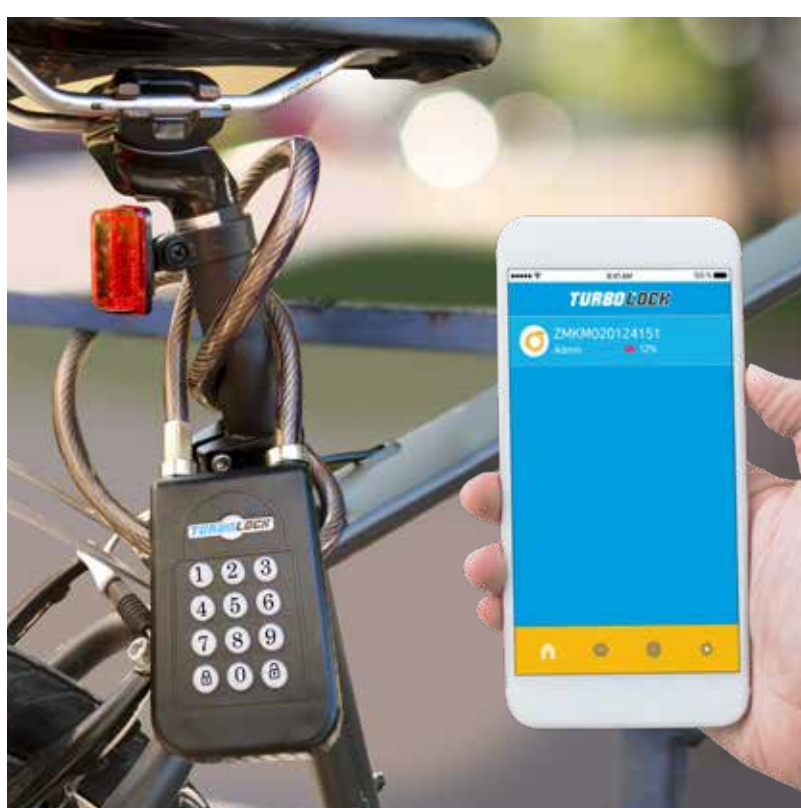

This Bluetooth bike lock allows you to connect your iPhone or Android to the TurboLock app to check access history, manage access, and lock up your bike.

\*USB Cable is not included.

**6-9 Months of Use**

The TL-400KBL lasts 6 – 9 months of use on a single charge. While other app enabled bike locks use disposable batteries, simply plug this smart bicycle lock in again for another 6 months of power.

**Smart Battery**

The smart bike lock uses a smart battery that sends a warning signal whenever the power gets low plus you can check battery life in-app with just a glance, so you never have to worry about your cycle lock losing power on you.

**Effortlessly Offer Keys**

If someone needs to borrow your bike lock, your bike, or both, you can easily manage users, issue keys, and more. Send friends and family permanent or temporary e-keys straight from your app.

**Mute the Keypad**

For a little extra bike security or just due to preference, you can turn the keypad sounds on or off anytime via the keypad itself.
