Off Timer

Press the timer button to set the air purifier to shut down after 1, 2, 4, or 8 hours.

Safety Precautions

Thank you for using a Bluemyst product. To assist you with reading the manual and using the device safely, please be sure to carefully read and observe the contents of the following symbols.

Any content with this sign must be strictly prohibited, otherwise it may cause damage to the device or endanger the user's personal safety.

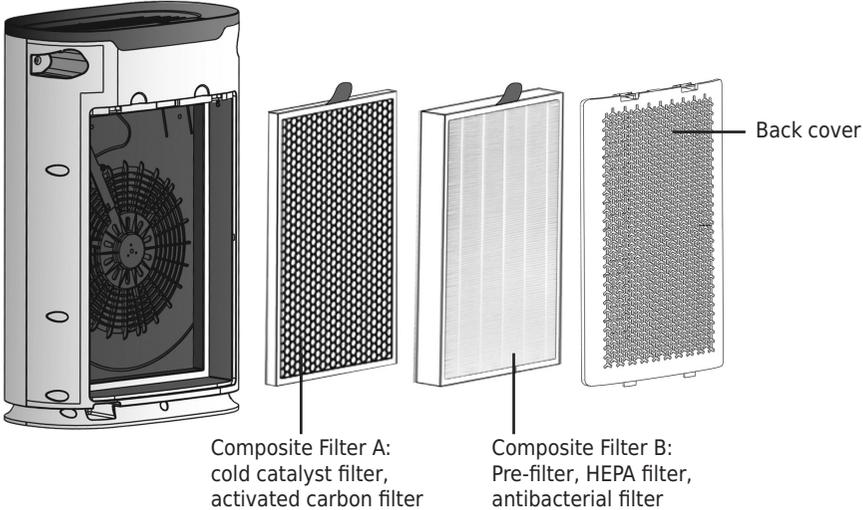

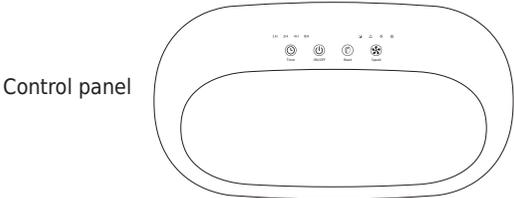

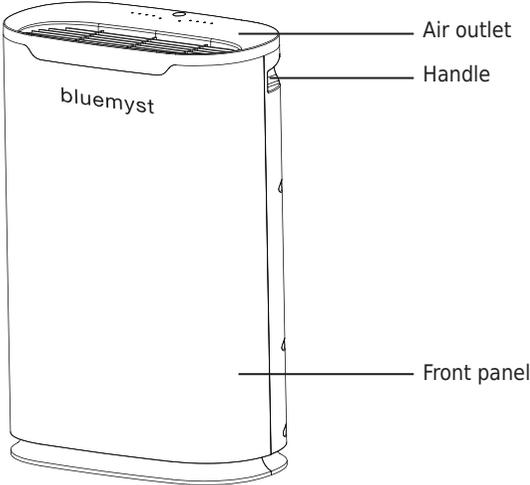

Any instruction with the above warning sign should be observed closely to ensure the personal safety of users. Please use the device in strict accordance with the contents of the warning.

- ⊘ Do not spray any paint, pesticides, alcohol, or chemicals on the device surface otherwise, it may cause surface cracks, electric shock, and/or fire.
- ⊘ If there is an accumulation of cleaning or sanitation liquids inside the air purifier, the substances will be released from the vent, which may cause irritation. After using insecticide or any other aerosol substance, please fully ventilate the room.
- ⊘ Air purifiers should not be used in explosive or corrosive atmospheres.
- ⊘ When the device runs, the air inlet and outlet cannot be touched. To avoid injury to the user or damage to the device, do not insert hands or any object into the inlet and outlet.
- ⊘ Do not sit on or place objects on the device, as this could cause injury, damage to the device or loss of device parts.
- ⊘ Do not use in the bathroom or other places with water as it may cause fire, electric shock or product failure etc.
- ⊘ Do not alter, decompose, or repair the device without authorization as it may cause fire, electric shock or malfunction etc.

- ⚠ If the power cord or plug is damaged, stop using it immediately as it may cause electric shock or fire.
- ⚠ Do not touch the power line with a wet hand.
- ⚠ When the device is undergoing maintenance, turn it off and disconnect it from the power source.
- ⚠ If the air purifier is not being used for an extended period of time, disconnect it from the power supply.
- ⚠ When the device emits an unusual smell, turn it off and disconnect it from the power source. Check with the Bluemyst customer service team for troubleshooting and measures that need to be taken to avoid fire, electric shock, or malfunction.
- ⚠ The air outlet can easily be contaminated with impurities. Be sure to prevent children from putting litter into it and check before using it to ensure it is clear.
- ⚠ The air purifier should be placed at least 50 cm from the wall and other objects.
- ⚠ If the power cord is damaged, it must be replaced immediately. Contact the Bluemyst customer service team to arrange a replacement.

Press to set a time duration for the air purifier to turn off. By pressing repeatedly, you can set an automatic turn-off at a 1, 2, 4 or 8 hour duration. The corresponding indicator light will turn on.

Remote Control Battery Replacement

To change the battery, squeeze on the Lock and slide out the Battery Cover. Remove the expired battery and replace with a new CR 2035 3v battery.

Setup Instructions

The air purifier ships with the two composite filters still in their packaging.

CAUTION: Air filters **MUST** be removed from their packaging before operating the air purifier.

- 1 Open the back cover of the purifier and take out the two packaged filters.
- 2 Remove the filters from their plastic packaging.
- 3 Insert the thinner Composite Filter A into purifier. The black, circle-textured active carbon filter should face toward you, with the pull tab pointing outwards.
- 4 Insert the wider Composite Filter B into the purifier. The white meshed antibacterial filter should face toward you, with the pull tab pointing outwards.
- 5 Replace the back cover. The air purifier is ready for operation.

Operation and Maintenance Guidelines

- 1 Place your air purifier in a location with a good airflow, not enclosed in an alcove or against a wall. Additionally, avoid particularly damp or dusty locations as this will cause too much wear and tear on the filters.
- 2 Avoid placing the device on soft or uneven surfaces to prevent vibration or noise during operation. Leakage may also occur.
- 3 Do not place any objects inside the device, other than the proprietary filters, to avoid internal or external damage.
- 4 If you shut down or do not use the device for a long period of time, disconnect it from the power supply and place the device out of reach of children.
- 5 When the device is being moved or undergoing maintenance, turn it off and disconnect it from the power supply to prevent fire, electric shock or injury.

During maintenance, disconnect the device from the power supply to avoid electrical shock or injury.

To improve the service life of the air purifier, please regularly maintain the device. Before maintenance, ensure that the device is turned off and disconnected from the power supply. After periodic use of the air purifier, the filter will need to be replaced. The filter reset button on the control panel will light up to signify that the filter needs replacement.

Clean appearance

When cleaning the air purifier, please turn off the power supply and clean it with a soft and clean dry cloth. Do not use alcohol, gasoline, benzene and other chemical solvents to clean it.

Air Filter Replacement

Air Filter Capacity

The air purifier filters have an average lifespan of 3,000 operating hours. Once they reach this limit, an alert light will illuminate on the control panel, indicating that the filters need to be replaced.

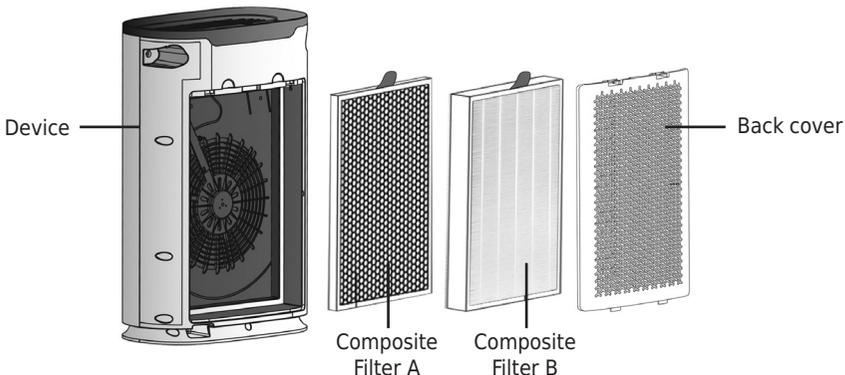

The air filters are not washable and must be replaced after 3,000 operating hours.

Replacement Air Filter Vendor

Visit www.bluemyst.com to purchase air filter replacements, or email customer support at info@bluemyst.com

Replacement Air Filter Installation

- 1 Open the back cover of the purifier and remove the used filters from the device.
- 2 Remove the new filters from their plastic packaging.
- 3 Insert the thinner Composite Filter A into purifier. The black, circle-textured active carbon filter should face toward you, with the pull tab pointing outwards.
- 4 Insert the wider Composite Filter B into the purifier. The white meshed antibacterial filter should face toward you, with the pull tab pointing outwards.
- 5 Replace the back cover. Connect the device to the power supply, press the power button, and press the filter key for 3 seconds. The filter indicator light should turn off, and the screen will have been reset successfully.

Troubleshooting

Status	Possible reason	Possible solution
Device doesn't work	Disconnected from power supply or power supply is turned off.	Connect to the power supply or turn on the power supply.
	Too loosely plugged into the power supply.	Connect plug properly in to the power supply.
	Rear cover may not be in place.	Reinstall the rear cover.
When the purifying begins, the sound is dull and the wind is insignificant.	Filter PE bag may be dismantled.	Remove the filter PE bag and reinstall the filter correctly.
	Vent may be covered.	Close the purifier and remove the vent cover.
The air outlet has an unusual smell.	There may be a continuous release of odor near the inlet.	Removing odors and making the purifier run for a period of time. The odor will gradually disappear.
	It may be time to replace the filter.	Replacing the filter.

Power line

- Do not use power other than the rated voltage (220V50Hz), otherwise it may cause fire, electric shock or malfunction etc.
- No power lines should be processed, forcibly bent, drawn, twisted, bundled or placed near high temperature objects. Power line breakage may cause fire, electric shock or malfunction etc.
- Do not place heavy objects or any other pressure on the power line. Pressure may cause fire, electric shock or malfunction etc.
- If the power cord or power plug is damaged, do not use the air purifier, otherwise it may cause fire, electric shock, short circuit or malfunction etc.
- Do not use wet hands to plug in the power line.
- Do not replace the power cord without authorization. Please contact the Bluemyst maintenance service center for any damage.
- The dust on the power plug or socket should be cleaned regularly. Too much dust and moisture can cause bad insulation, which may cause fire, electric shock or malfunction etc.

WARNINGS

Non-professional personnel should refrain from disassembling the device without authorization to prevent the danger of electric shock.

When replacing the filter screen, disconnect the device from the power supply first.

If there is any malfunction, follow the instructions and troubleshooting method. If the device malfunction persists, please contact Bluemyst customer support.
