

# 65SK9500PUA

SUPER UHD 4K HDR AI LED TV w/ Nano Cell™ Display

65"

\* Class size: See below for details.

## α7 Intelligent Processor

LG ThinQ AI

4K Cinema HDR

Full Array Dimming Pro

Nano Cell™ Display

## DESCRIPTION

Enjoy a more lifelike picture with the depth, sharpness and color of the α7 intelligent processor, plus LG ThinQ AI, 4K Cinema HDR and a cinema screen design. The LG SUPER UHD Nano Cell™ Display improves color accuracy. Full Array Dimming Pro offers the most precision in backlight control for deeper black levels and contrast.

## KEY FEATURES

### α7 Intelligent Processor

Enjoy a more lifelike picture with superior depth, sharpness, and remarkably accurate color. The α7 Intelligent Processor delivers an enhanced 4K HDR image for a truly cinematic experience.

### LG ThinQ AI

LG ThinQ AI televisions become the hub for all of your connected smart devices. Beyond apps and entertainment, LG ThinQ AI uses intelligent voice control with Google Home built in, plus Amazon Echo compatibility to create a Smart TV platform for the Internet of Things.

### 4K Cinema HDR

LG SUPER UHD gives viewers the most premium content choices, all optimized scene-by-scene. Comprehensive high dynamic range support now includes HDR10 and HLG, plus cinema reference standard Dolby Vision® as well as Advanced HDR by Technicolor, the movie industry's color experts

### Full Array Dimming Pro

LG's most precise backlight control uses multiple dimming zones to better display the dark and light areas of the picture at the same time, for deeper black levels and superior contrast while revealing improved picture detail.

### Nano Cell™ Display

The latest generation of Nano Cell™ Display improves color accuracy with its wider color gamut while absorbing unwanted light. Nano Cell™ Display now results in truer colors, reduced reflectivity and deeper black levels, even at a wider viewing angle so any seat can be the best in the house.

# LG SUPER UHD TV

## SPECIFICATIONS

### PICTURE QUALITY
