Free Standing Monitor Stand for Desktops

Monitors were meant to be adjustable. Static immobile stands are limiting, provide poor image quality, and they can actually be poor for your health. This mount stand creates a whole new range of motions from rotating, to tilting, to height adjustability. Your monitor will be capable of adapting to your specific needs with its new dynamic capabilities.

Create an ergonomic environment in seconds to adjust to your angle, standing, or sitting position. Tilt up to 45 degrees up or down and adjust the height over 18 inches for optimal image quality. If long graphs or articles are a common part of your daily regime, you can rotate your monitor from landscape to portrait, no disassembly required.

The sturdy steel alloy V-shape base can support 17.6 lbs of weight, 32 inch screens, and requires very little assembly. No drilling, no clamps, and no grommet holes required. The stand is engineered for nearly any desk setting so you don't have to worry about compatibility or difficult construction. All necessary hardware and instructions are included.

- Max Screen Size 32 inch
- Rotate 360 degrees
- Tilts up or down 45 degrees
- Height adjustable 18 inch
- Large sized V-shaped base
- Load Capacity 17.6 lbs
- VESA 75x75 and 100x100
