Alienware Elite Gaming Mouse – AW959
The takeover is complete.

Alienware's Elite Gaming Mouse leverages advanced comfort engineering to offer an uncompromised gaming experience. This generation introduces a slimmer design for improved comfort and ergonomics. We have also added support for the latest generation Alienware Command Center software. With 4 variable levels of weight adjustment, 5 configurable levels for DPI switching, AlienFX, and 11 programmable buttons, gamers can masterfully control their in-game experience.

Key Features for AW959

Alienware Design & AlienFX Lighting:
- The Iconic Alienware Design will elevate your game with imposing style and precise form.
- Customizable AlienFX™ lighting provides a personalized, dynamic look to make your accessories reflect your style and deliver deeper immersion in the game with in-game lighting effects.

Ultimate Optical sensor
- Model PixArt PMW3360 with 100 - 12,000 DPI
- Increase your reaction speed and precision with a first-class optical sensor and 5 on-the-fly DPI settings.

9-11 programmable buttons
- left click/right click/wheel click/wheel left tilt/wheel right tilt/2 or 4 buttons on left side/DPI (left/right) **with onboard memory**

Ultimate customization
- Change the weight of your mouse (configurable four 5 grams weights) to fit the speed and precision that you desire.
- 2 interchangeable right wings for optimal comfort
- 3 adjustable multi-position palm rest to adapt to most hand sizes

July 2018

Other Features

Alienware Command Center*
- Be in control of your mouse with the Alienware Command Center: Increase your gaming level by adjusting your specs and personalize your mouse by changing the lighting to match your mood.
