Making Good Sound Great[™]

LOAD GENERATING DEVICE & SIGNAL STABILIZER FOR OEM SOUND SYSTEMS REQUIRING A SPEAKER LOAD

PROVIDES STABILITY TO PREMIUM AMPLIFIED OEM SOUND SYSTEMS

IDEAL FOR PREMIUM AMPLIFIED DODGE[®], CHRYSLER[®], JEEP[®], MASERATI[®]

MAXIMUM INPUT 25 VRMS (150 WATTS)

FACTORY UPGRADE ACCESSORY

AC-LGD 60™ 60 OHMS

LOAD GENERATING DEVICE & SIGNAL STABILIZER FOR OEM SOUND SYSTEMS REQUIRING A SPEAKER LOAD

What is a Load Generating Device?

Today's factory amplifiers feature built in protection circuits which can mute some or all audio outputs when the factory speakers are removed. The AC-LGD 60 has been designed to generate load and stabilize signal from amplified factory systems to ensure the best possible audio.

Quick Start:

1. Remove one speaker level input plug from your AudioControl active line output converter (LOC), processor, or amplifier
2. Unplug one end of AC-LGD 60 then plug the AC-LGD 60 into the LOC
3. Install the plug you removed from the LOC to the open end of the AC-LGD 60
4. Connect your factory speaker signals to the AC-LGD 60
5. If you are using a LOC with different style connectors, unscrew the connectors from the AC-LGD 60 wires and connect the wires accordingly

Important

- ➔ Do not exceed **25 Wrms** (150 watts) of input
- ➔ Operating Impedance: 60 Ohms
- ➔ Do not install under carpet or near heat sources

What's Included?

One pair of AC-LGD 60s prewired with EIA color coded wires
