COOL AIR CURLER
CURL + PROTECT

LASTING LOOSE CURLS

Game-changing innovation using a perfect mix of both cool air and heat to effortlessly create lasting loose curls with a smooth, shiny finish.

The heated ceramic plates smooth the hair whilst the large outer barrel gently releases cool air, instantly setting the curl for long-lasting results.

Simply place hair between the heated plates and rotate the style 180° as you slide down the hair to create the perfect curl.

COOL AIR TECHNOLOGY

ULTIMATE HAIR PROTECTION

Innovative cool air technology creates lasting loose curls and waves with less damage.

Cool air flows through the channels in the outside barrel to set your style and protect hair from heat damage.

UNIQUE FEATURES

QUARTZ CERAMIC TECHNOLOGY

- Helps reduce frizz for smooth and shiny hair!
- Provides easy glide and pre-heats the hair to form lasting smooth curls.

3 HEAT SETTINGS + COOL AIR

- Cool Setting turns fan on to generate cool air. Air is channeled along the barrel to set the curl immediately for long lasting results
- Low, medium and high heat settings ideal for all hair types.

SPLIT BARREL & HIGH TEMPERATURE

- Split barrel heats and holds hair in place for easy curling.
- Ceramic coated plates heats up to 400F (205C).
- Uniform heat recovery maintains optimum heat level while styling.

EASY CURLING

CLOSE | WRAP | GLIDE | RELEASE

Place a section of hair between the plates, rotate the styler 180° back, wrap hair around the outer barrel and gently glide down through the length of the hair for easy curling in a single stroke.

★★★★★ Love it!!

Reviewed in the United Kingdom on 5 November 2020

I have always struggled to curl my thick (already naturally curly) hair and have tried straighteners, wands etc. This is amazing as it straightens and curls my hair in one and takes about 10 minutes to do. I love the cooling aspect which helps the curls stay and protects my hair!

Amanda fc

★★★★★ Great curls and waves.

Very easy to use and it gives excellent results within minutes. I've invested in several hair styling products and this is by far the best. I've not tried to use it purely as a straightener - I think I'll keep my dedicated straighteners for that job. The Babyliss curl styler has a cool air system that can be a bit noisy but that function can be switched off. The choice of three heat settings is simple to select. I bought these when there was a discount so I'm a very happy customer.

Can't believe I never bought this sooner!! I normally quite good at doing curls with my straighteners but recently they've not been staying in. I decided to buy this with the hope it would give me some sort of curl.... AMAZING!! I plugged it in, selected the temperature, you could hear the air starting and then off I went. Less than 10 minutes to do a full head of curls (less than 20 minutes to do my daughters thick hair). Two days and two shifts of work later and the curls are still going strong. Definitely try this, you will not be disappointed!

As you can see I have a short bob. I wasn't expecting much but wow! Just wow! I can do my head in 10 mins. This is my second time using it. Very easy to use and great curls.

Far easier than straightner curls. It's a cross between straighteners and a curling tong. But with cool air. It doesn't get hot like straightners do and you can grip the end.

BaByliss Curl Luxe Styler Review

I have found a new curler that promises to be so easy to use, creates long lasting waves, and is pretty affordable too. Here's what you need to know about the BaByliss Curl Luxe Styler. Does it work?

NSG G-CLUB BEAUTY FASHION ISSUES FOLLOW

The new Curl Styler Luxe by BaByliss

For a wavy look hairstyle, with a long lasting effect.

The hair trends of this fall/winter 2020, adapting to the period we are experiencing, are authentic and not extremely complex, easy to replicate at home.

To experiment with new looks and do-it-yourself styling, without the necessity to leave home to visit a professional salon, BaByliss comes with its brand new Curl Styler Luxe, the latest innovation from the brand, leader in the hair care industry. The styler with an original and chic design uses a mix of air and heat, while the ceramic plates give shape to soft waves, the large external cylinder gently releases fresh air, ensuring protection and the long-lasting effect.

Product Description: Get cascading waves any professional stylist would envy—without visiting the salon! Equipped with an innovative outer barrel cooling system to set your style and protect hair, this ingenious curler creates the waves you crave—with less damage—right at home. Quartz ceramic-coated plates heat up to 400F, gliding along your hair as you wrap and release flawlessly formed waves, which are then set in place by the cooling outer barrel before being released. Uniform heat recovery distributes heat evenly, at just the right level, for consistent results. Choose from low, medium, and high heat settings, plus a cool option. With 30-second heat-up, there's less waiting and more styling.

Product Features:

- Curl and Protect
- Unique Outer Barrel Cooling System: cool air sets your style and helps protect your hair
- Quartz-ceramic plates heat up to 400F for smooth, shiny results
- Uniform heat recovery system maintains optimum heat levels
- 3 heat settings plus cool setting (low, med, high)
- Cool setting
- Auto off
- 30 second heat up
- Cool tip
