U6 Series Quantum Hisense Android TV

Model 75U6G

4K ULED

Beauty Beyond the Screen

Hisense is proud to introduce a brand new member to our family of ULED televisions. The U6G, a QLED tv with a host of features both expected and unexpected. For consumers wanting to “test out” some of the most talked about technologies all in one package without having to worry about how many commas are on the price tag, the U6G makes the most sense.

4K resolution and Quantum Dot Color combine UHD clarity and over a billion colors for beautifully clear and vibrant picture. With the latest in premium HDR technologies, Dolby Vision HDR* enhances full array local dimming zones for broad contrast between bright and dark content across the entire screen. At the heart of the 75U6G is Hisense's proprietary Hi-View Engine that manages the numerous display processes that provide a premium picture at a non-premium price.

Say “goodbye” to boredom and “hello” to Android TV™, featuring more than 700,000 movies and shows plus video streaming from Netflix, Disney+, Hulu, YouTube and many more. Or browse Google Play for fun games. Android TV comes with Google Assistant built-in so you can quickly find the latest blockbuster, check the score of the big game, or dim the lights* — all without leaving what you're watching. The U6G makes sure the best of TV is at the tip of your finger... or lips.

4K ULED™

Take your picture from great to incredible. The picture quality of the U6G is driven by our exclusive ULED technologies, which drive the PQ enhancing algorithms that boost color, contrast, brightness, and motion. All are calibrated to work together in perfect harmony – to upgrade the performance of every pixel and create a picture that transforms your favorite entertainment into your Ultra-new reality.

Quantum Dot Wide Color Gamut

The introduction of Quantum Dot technologies opened some eyes. We've unlocked the power of over a billion color combinations perfectly expressed. It's easier to feel connected to what's real while still enjoying the incredible with the U6G Series.

Dolby Vision™ • Dolby Atmos®

The fusion of Dolby Vision HDR* picture and Dolby Atmos sound transforms your TV into an entertainment powerhouse. These image and sound technologies from cinema, now brought together in the home, provide amazing realism that you'll see, hear, and feel like never before.

Hi-View Engine (4K)

Using machine learning, this proprietary technology uses a complex combination of hardware and software technologies to make automatic adjustments to the picture in real-time, enabling fast graphic processing and the best viewing experience. It continuously modifies settings by assessing individual scenes, and then breaks down, analyzes, and fine-tunes each frame down to the pixel. The result is a beautiful, precise image and clear motion that can only be experienced on Hisense ULED TVs.

Peak Brightness/Full Array Local Dimming Zones

With higher peak brightness, overall picture quality can be brighter - which is great for well-lit rooms - and high dynamic range content is sharper with better highlights and details. In the U6G Quantum, up to 600-nits peak brightness across 60 local dimming zones ensures a superior HDR experience.

FilmMaker Mode

Filmmakers, Hollywood studios, consumer electronics companies and the UHD Alliance have collaborated to make this next-level home theater viewing experience possible. By disabling all post-processing (e.g. motion smoothing) and preserving the correct aspect ratios, colors and frame rates, FilmMaker Mode enables your TV to display the movie or television show's content precisely as it was intended by the filmmaker.

Voice Remote

Voice control makes interacting with your Smart TV easier and more intuitive. Open or search for apps, control the volume and inputs, or search for your favorite TV shows and movies simply through the power of your voice.

Google Assistant Built-in

The Google Assistant* is built into Android TV, so tell your TV to turn on the lights, change the thermostat, add an item to your grocery list, or play the latest viral video. And with universal search, it's never been easier to get recommendations with Android TV.

Works with Alexa

The U6G works with Alexa through any Alexa-enabled device that you already own. Speaking commands to power on and off the TV, change channels, and other TV-related tasks is just as fun as it sounds.

*Google Assistant-compatible products required to use voice commands

*HDR viewing experience will vary by model, content availability and internet connection

TECHNICAL SPECIFICATIONS

DIMENSIONS/WEIGHT	
TV Dimensions(without the stand)	66.0×37.8×3.3 inches
(with the stand)	66.0×41.0×14.0 inches
TV Stand Width	51.9×14.0 inches
TV Weight (without the stand)	63.5 lbs
(with the stand)	64.8 lbs
Carton Dimensions (WxHxD)	73.5x45.2x8.9 inches
Shipping Weight	97.0 lbs
DISPLAY	
Actual Screen Size (Diagonal)	74.5 inches
