

**CULTURE** ≡ V1

**USER MANUAL**

## 1. PRODUCT OVERVIEW

- ① Active Noise Canceling Switch (ANC)
- ② AMBIENT (Enables conversation with persons in proximity)
- ③ Battery meter & ANC indicator
- ④ USB charging port
- ⑤ Bluetooth LED indicator
- ⑥ Bluetooth/MFB (Power on / Power off / Call / Pairing button)
- ⑦ Touch pad (Double Tap = Play/pause, Vertical swipe = Volume +/-, Horizontal swipe = previous track / next track)
- ⑧ AUX jack
- ⑨ Built-In Microphone

## 2. BASIC OPERATIONS

Button	Function	Operation
<b>ANC</b>	ANC function on/off	Slide the ANC switch from <b>OFF</b> to <b>ON</b> .
<b>AMBIENT</b>	AMBIENT Function ON/OFF	Ensure ANC function is activated, press <b>AMBIENT</b> button once to active. Press again close <b>AMBIENT</b> mode.
	Power ON/OFF	Press and hold  3s
	Pair a Device	From <b>OFF</b> status <b>Press and Hold</b>  5s till the LED indicator blinks <b>RED</b> and <b>BLUE</b> alternately
	Answer/End a call	Press  once
	Reject a call	Press  twice while a call is incoming
	Voice assistant (phone features, e.g. Siri)	Long press  and release (This function depends on the model/make of the device)
	Redial last number	Press  twice when synced with phone
	Clear paired history	From <b>OFF</b> , press  until the LED indicator shows <b>PURPLE</b> for 2s. This will take approximately 10 seconds.
<b>TOUCH PAD</b> (right ear cap)	Volume up	Swipe up vertically
	Volume down	Swipe down vertically
	Next track	Swipe forward horizontally
	Previous track	Swipe backward horizontally
<b>SMART SENSOR CONTROL</b>	Pause (music only, not for calls)	Take off the headphones
	Play (music only, not for calls)	Put the headphones back on

## 3. PAIRING AND CONNECTING

### 3.1 Pairing and Connecting with phone

- 1.) To enter headset into pairing mode (from off status) hold  for 5s till the LED indicator flashes **RED** & **BLUE** alternately

2.) Activate Bluetooth on your phone/device, search for device and select “Culture V1” to connect.

Now your Culture V1™ headphones are connected with your phone!

### 3.2 Reconnection

Auto-reconnection with one phone - You do not need to re-pair the headphones with your phone every time. Simply make sure both your device and the Culture V1™ headphones are on, and then wait for 2~10s. They will automatically reconnect.

## 4. ACTIVE/ CLOSE ANC MODE

Activate ANC Mode: Slide the ANC switch from **OFF** to **ON** (It can block out approximately 98% ambient sounds)

Deactivate ANC Mode: Slide the ANC switch from **ON** to **OFF**.

## 5. ACTIVE/ DEACTIVATE AMBIENT MODE

First, ensure that ANC is **ON**, then press the **AMBIENT** button once to active or deactivate **AMBIENT Mode**.

**AMBIENT Mode** is designed to improve the ability of the user to hear conversations in noisy environments.

## 6. FAQ

### 6.1 What is “ANC”?

**ANC** stands for “Active Noise Cancellation.” This feature is designed to eliminate ambient noise from your environment. This allows you to enjoy your music without distraction while working, traveling or simply relaxing. It is most effective at reducing low frequency noises such as those from an airplane engine or a large crowd (frequencies from 20HZ-800HZ).

### 6.2 Why do I still hear certain noises with ANC on?

The ANC feature is best at reducing constant/steady **LOW** frequency sounds. Sudden, irregular noises such as shouting or car horns are not as effectively canceled out.

### 6.3 Is "AMBIENT Mode" a kind of hearing aid?

No, **AMBIENT Mode** is not a hearing aid. **Culture VI™ AMBIENT Mode** is designed to improve the ability of the user to hear conversations in noisy environments.

### 6.4 Why am I still suffering an audio delay?

To achieve low latency, your Bluetooth transmitter support aptX LL Bluetooth transmission. If not, there may be a delay between audio and video.

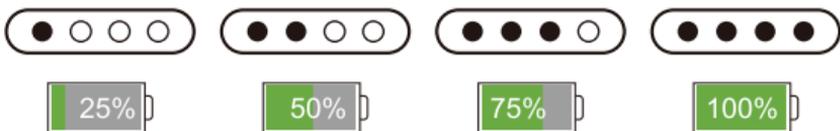

### 6.5 Can I still use my headphone if the battery has run out?

Yes, when the battery is low you can use the 3.5mm audio cable to stream music ( just like standard wired headphones).

**Note: Buttons/Functions on headphones will not work with cable connection. Audio only.**

### 6.6 How to charge?

When battery power is less than 10%, the Bluetooth LED will blink **RED** and you will hear a beep sound every five minutes. At that time please charge your Culture VI™ headphones. You can charge them via the supplied micro USB cable to your own USB chargers (wall charger/travel charger, etc.) with 5V/500mA~2A, or PC/TV USB port. It's ok to use most mobile phone chargers on the market. The Battery meter LED will show  when fully charged.

### 6.7 How to connect with two phones?

**•STEP ONE:** [Connect the 1st phone] From **OFF**, press and hold the  for 5 seconds until the LED indicator blinks **BLUE** and **RED** alternately, then pair with the first phone as normal.

**•STEP TWO:** [Connect the 2nd device] Turn headphones off, then press and hold  again until the LED indicator blinks **BLUE** and **RED** again. Pair with the second device as normal.

**•STEP THREE:** [Search & connect headphones on originally paired device manually] Connect with original device by searching manually. Both devices will then be connected with the Culture V1™ headset allowing you to transition.  
**Note:** You do not need to re-pair the Culture V1™ headphones with your devices every time. Make sure both your device & Culture V1™ headphones are on to automatically reconnect.-

## 7. Product Specification

BT version: 5.0

Noise cancellation rate: approximately 98%

Supported profiles: HFP, HSP, A2DP, AVRCP

Audio Codec: AAC, aptX, aptX Low Latency

Audio impedance: 32Ohm

Charging time: about 3.5hours

Operational range: ≥10m

Wired Connection: 3.5mm audio cable

Working time (Wireless only): 25 hours

Working time (Wireless+noise canceling): 15 hours
