EMERGENCY INSTRUCTIONS

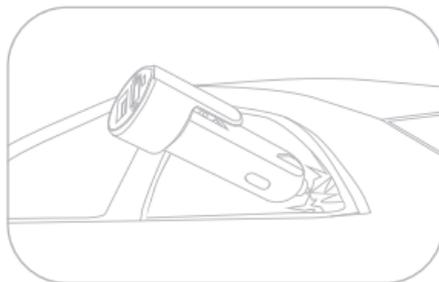

A. In the event of an emergency, the blade on the charger can be used to cut through the seat belt.

1. Place the blade on the seat belt and pull through the material
2. If necessary, repeat action until seatbelt is completely cut

B. In the event that the doors are inoperable, use the Safety Hammer to break the driver or passenger side windows.

1. Strike at each corner to crack the window

2. Use caution when pushing broken glass out of the window frame

ATTENTION:

- Only use Xscape Safety Hammer & Seatbelt Cutter in emergency situations
- Disconnect USB devices before using safety functions
- Breaking glass may cause injury
- Avoid looking directly at the window while attempting to break the glass
- ONLY attempt to break the glass at the corners of the windows.
- The Safety hammer is sharp. Use care not to cause unwanted damage to surfaces that are easily scratched
- Xscape Dual USB with Safety Hammer and Seatbelt Cutter is NOT a toy (Not recommended for use by children)
- Do not disassemble Xscape car charger
- RapidX is not responsible for harm or injury caused in the use of this product
