

Turning your new home into your dream home.

You've found your new home! It's got the number of bedrooms and bathrooms you've always wanted, perhaps it has a finished basement or a larger backyard. While you're excited about so many things about this home, there may be a few areas we can help make better so your new home is your dream home.

Here are **five ways to make big changes**, with the help of a free consultation from a Best Buy® Home Expert, that can make big improvements to your new home.

[Schedule A FREE Consultation](#)

1. Smart home ecosystem.

Turning your new house into a smart home is a great way to bring convenience, fun and green living to your property. Voice or smart device control of your lights, speakers, TV—you name it—brings a level of modernity to your home that's sure to make your neighbors jealous.

With so many different smart home solutions available, it's easy to get one item from one kind of system, several others from another, and before long you have a hodge-podge system you're unhappy with. That is why it's imperative to work with a Best Buy Home Expert who will look at the bigger picture to design a smart home that's not made up of parts and pieces from different systems, but rather works together seamlessly as one. This means your TV voice control, smart speakers, home security and other items you have connected into your smart home unit work together without issue.

For example, when you say, "OK Google, Goodnight", you can automate all of your lights and technology to turn off at once, while the window blinds close and the garage door shuts. We can help make this happen. Let us show you how.

2. Upgrade the kitchen.

The kitchen is the heart of the home; where family and friends gather, dinners are made and memories are created. If your new home has outdated appliances, or they're simply not the style or color you prefer, we can help. Today, the styles, features and functionality go beyond wanting to upgrade from electric to gas, preferring stainless steel, or deciding between a French door refrigerator or a top-freezer model. Now there's a world of additional options available, and with a free consultation, we're ready to make those decisions easy and fun.

Let's start with functionality. Some of the cool additions to appliances include ovens with air fryers, knobs that have backlighting, special griddle-top cooking areas. The latest refrigerators make craft ice, have see-through doors, and even have cameras inside so you can see what you're out of, even when you're at the grocery store.

These same appliances come in unique colors where you have the option to mix and match the style of the handles. Your kitchen no longer needs to look like your neighbors' kitchen and it certainly should outshine anything you had growing up. Add in energy efficient models, quick heat and boil features, and water-saving dishwashers, and, all of a sudden, you not only have a more beautiful kitchen, it's a more sustainable one as well.

We have a host of [kitchen ideas](#) to choose from. Start with a free consultation. We'll measure everything to make sure it all fits perfectly and, through our discussions, we'll make sure they match your design and use needs as well. Let us show you just how far we can take your new kitchen.

3. Add a new home theater to any room.

Maybe you're thinking, "My new home doesn't have space for a home theater," and you immediately want to jump to idea #4. Hold on. It's really amazing all the places we can install a home theater, from the simple, to the ultra-complex. It's really up to you, your home's layout and your budget. But trust us—we can get a home theater into any home.

Let's start with a complete home theater with built-in projector, 240" screen, built-in Dolby Atmos surround sound, leather theater seating, and smart control to bring it all together. Whether in a dedicated home theater room, a spare bedroom or a basement space, we have the design chops, the engineering, and the installation capabilities to make this a reality. You can add a starry night sky, special acoustic treatments, unique theater style sconces and a back-lit screen. If you can dream it up, we can make it happen.

Want a less traditional home theater in a family room or basement? We can do that too. We've created spaces that have a regular TV for everyday use but, when it's movie time, an automated projection screen drops from the ceiling and the ceiling-mounted projector brings the movie experience to life. This provides the best of both worlds.

For an even simpler solution, [short-throw projectors](#) offer the theater experience without having to mount a projector in the room, with a maximum viewing size of upwards of 130". The best part is how easy it is: just place the short throw projector on a TV-style stand that is inches from the wall and, with a short-throw screen, you're enjoying the movie theater experience. Add a soundbar and some wireless surround sound speakers, and boom—theater!

We've got [home theater ideas](#) for days, so schedule a free consultation and a Home Expert will show you everything that's possible in your home.

4. Bring entertainment outside.

Yard space is just one of the many things that are great about owning a home. A Home Expert can help you [bring your outdoor spaces to life](#) with the right outdoor technology. Want a deep dive into what's possible? Read our outdoor entertainment blog [here](#). Otherwise, here are some quick tips.

Decks, patios, porches—bringing audio to these spaces adds a sense of elegance and enjoyment. We'll help you set up outdoor speakers for any space, from mounting speakers on your home or pergola, to the Sonance Outdoor Speaker System that uses smaller speakers to surround your yard in sound.

The ultimate outdoor upgrade is an outdoor TV. We've got solutions for full sun, partial sun and even shaded areas that all stand up to whatever Mother Nature can throw at them.

Let us help you bring the fun outside.

5. Add peace of mind.

Keeping your new home safe and secure is key. Thankfully we have [solutions to monitor your home](#) both when you're at home and away, and we have the install capabilities to easily bring them to life.

Smart doorbells will let you know when someone is at your door and allow you to chat with them through the camera. Now they don't even need to know when you're gone.

Full security systems will not only alert you to any issues happening at your home, but, with professional monitoring, you have added peace of mind.

Another great way to protect your home is with [smart lighting](#) and blind control. With lights designed to turn off and on at certain times of the day and night, it will look like you're home even when you're not. We also offer motion sensors and outdoor security cameras, so you can always be aware of what's going on in and around your home.

Welcome to your new home.

Let us help bring fun, relaxation and joy home. From the list of updates above, to smart home solutions, garage solutions, gaming rooms and bathroom updates, we aim to make every room in your home your favorite room.

Let's make your new home even more amazing!
