## Getting Started

Connecting your DPF with power by using the power adapter provided. The DPF will start up and go to main menu.

## Loading photos from memory card or USB

Insert one of the SD/SDHC card to your digital photo frame by following the direction showed as below:

You can also insert a USB flash disk which has pictures to the USB slot to play pictures stored in the USB.

The digital photo frame will auto slideshow pictures in your card or USB which has been inserted.

Keep pressing **Exit** button on remote control to exit to the main menu.

## Setting

There are two ways to go to Setting mode:

1. Press **LEFT/RIGHT** button to move cursor to Setting and press **Enter** to enter the setting interface.
2. Press **Setup** button on remote control to setup interface directly.

There will be 3 icons listed at the left side. From top to bottom, they are Photo Setup, Calendar Setup and System Setup respectively.

You may press **Up** button or **Down** button to select one of the icons, and press **Enter** or **Play/Pause** to enter the detailed setup options (press **Exit** to return), then press **Up/Down** to choose what you want to set, and press **Left/Right** to change the settling. Press **Exit** to after finish the setting.

## What you can setup

You can setup slideshow interval time, transition effect, show type in fit screen or full screen, browse in thumbnail mode or Browse Mode, play repeat mode, photo auto play or not, brightness and contrast, TFT saturation, OSD language and restore all of the settings to factory default setting by selecting Reset Default Setting.

## Calendar and Clock

In Setup setting (start up setting), choose Calendar Setup and comfirm. Then you will enter the interface with four options: Display Mode, Date, Clock Mode and Clock Time.

Press **Up/Down** to select Date and press **Left/Right** to set Date.

Press **Exit** button to go to the main menu interface after setting.

You may follow the same setps to setup Clock.
