# SAFETY INFORMATION

## PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY:

- 1 Do not attempt to operate this oven with the door open because this can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- 2 Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.
- 3 Do not operate the oven if it is damaged. It is particularly important that the oven door closes properly and that there is no damage to the:
  - (a) DOOR (bent)
  - (b) HINGES and LATCHES (broken or loosened)
  - (c) DOOR SEALS and SEALING SURFACES
- 4 The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

## IMPORTANT SAFETY INSTRUCTIONS

**WARNING:** To reduce the risk of burns, electric shock, fire, injury to persons, or exposure to excessive microwave oven energy when using your oven, follow these basic safety precautions.

- 1 Read all instructions before using the oven.
- 2 Read and follow the specific: **PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY**; found on page 3.
- 3 As with any cooking appliances, close supervision is necessary to reduce the risk of a fire in the oven cavity or when used by children.
- 4 To reduce the risk of fire in the oven cavity:
  - Do not overcook food. Carefully attend the oven when paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
  - Remove wire twist-ties and metal handles from paper or plastic containers/bags before placing them in the oven.
  - If materials inside the oven ignite, keep the oven door closed. Turn the oven off and unplug the oven or shut off power at the fuse or circuit breaker panel.
  - Do not use the oven cavity for storage purposes. Do not leave paper products, cooking utensils, or food in the cavity when not in use.
- 5 This oven must be grounded. Connect only to a properly grounded outlet. See **GROUNDING INSTRUCTIONS** found on page 5.
- 6 Install or locate this appliance only in accordance with the provided installation instructions.

- 7 Some products, such as whole eggs and sealed containers (for example closed glass jars), are able to explode and should not be heated in this oven.
- 8 Use this oven only for its intended purpose, as described in this manual. Do not use corrosive chemicals or vapors in this oven. This oven is specifically designed to heat, cook, or dry food. It is not designed for industrial or laboratory use.
- 9 As with any appliance, close supervision is necessary when used by children. Do not operate this oven if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.
- 10 This oven should be serviced only by qualified service technicians. Contact the nearest authorized service facility for examination, repair, or adjustment.
- 11 Do not cover or block any openings on the oven.
- 12 Do not store or use this oven outdoors.
- 13 Do not use this oven near water (for example, near a kitchen sink, in a wet basement, near a swimming pool, or similar locations).
- 14 Do not immerse the cord or plug in water.
- 15 Keep the cord away from heated surfaces.
- 16 Do not let the cord hang over the edge of a table or counter.
- 17 When cleaning the surfaces of the door and the oven that come together on closing the door, use only mild, nonabrasive soaps or detergents applied with a sponge or soft cloth.
- 18 Liquids, such as water, coffee, or tea can be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. **THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A SPOON OR OTHER UTENSIL IS INSERTED INTO THE LIQUID.**
  - Do not overheat the liquid.
  - Stir the liquid both before and halfway through heating it.
  - Do not use straight-sided containers with narrow necks.
  - After heating, allow the container to stand in the microwave oven for a short time before removing the container.
  - Use extreme care when inserting a spoon or other utensil into the container.

**WARNING:** Handling the power cord on this oven, or cords associated with accessories sold with this oven, will expose you to lead, a chemical known to the state of California to cause cancer and birth defects or other reproductive harm.

**Wash your hands after handling.**

## SAVE THESE INSTRUCTIONS

# GROUNDING INSTRUCTIONS

**WARNING:** Electric Shock Hazard

Touching some of the internal components can cause serious personal injury or death. Do not disassemble this oven.

This oven must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This oven is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded. DO NOT alter the plug for use in a 2-prong receptacle. If the plug will not fit into a receptacle, have the proper receptacle installed by a qualified electrician.

**WARNING:**

Do not insert your fingers into any gaps or holes. It may cause injuries.

Consult a qualified electrician or serviceman if the grounding instructions are not completely understood or if doubt exists as to whether the oven is properly grounded. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-pronged grounding plug, and a 3-slot receptacle that will accept the plug on the oven. The marked rating of the extension cord shall be equal to or greater than the electrical rating of the oven.

- A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
- Longer cord sets or extension cords are available and may be used if care is exercised in their use.
- If a long cord set or extension cord is used:
  - The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the oven.
  - The extension cord must be a grounding-type 3-wire cord.
  - The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over unintentionally.

# RADIO INTERFERENCE

- 1 Operation of the microwave oven may cause interference to your radio, TV, or similar equipment.
- 2 When there is interference, it may be reduced or eliminated by taking the following measures:
  - Clean the door and the sealing surface of the oven.
  - Reorient the receiving antenna of the radio or television.
  - Relocate the microwave oven with respect to the receiver.
  - Move the oven away from the receiver.
  - Plug the oven into a different outlet so that the oven and receiver are on different branch circuits.

Cookware and cooking materials

**WARNING:** Personal Injury Hazard  
Tightly-closed containers could explode. Closed containers should be opened and plastic pouches should be pierced before cooking.

Cookware and other materials must fit on the turntable. Always use oven mitts or pot holders because cookware may become hot.

Refer to the [Materials you can use](#) on page 6 and [Materials to be avoided](#) on page 7 tables as a guide, then test before using.

There may be certain non-metallic utensils that are not safe to use for microwaving. If in doubt, you can test the utensil in question following the procedure below.

Utensils test

- 1 Fill a microwave-safe container with 1 cup (250 ml) of cold water, along with the utensil in question.
- 2 Cook on maximum power for one minute. **Do not exceed one minute cooking time.**
- 3 Carefully feel the utensil. If the empty utensil is warm, do not use it for microwave cooking.
- 4 To prevent the risk of fire, do not put hot pads, blankets, clothes, or other textiles in oven.

Materials you can use

MATERIAL	REMARKS
Browning dish	Follow the manufacturer’s instructions. The bottom of the browning dish must be at least 3/16-in. (5 mm) above the turntable. Incorrect usage may cause the turntable to break.
Dinnerware	Use microwave-safe only. Follow the manufacturer’s instructions. Do not use cracked or chipped dishes.
Glass jars	Always remove the lid. Use only to heat food until just warm. Most glass jars are not heat resistant and may break.
Glassware	Use heat-resistant oven glassware only. Make sure that there is no metallic trim. Do not use cracked or chipped dishes.
Oven cooking bags	Follow the manufacturer’s instructions. Do not close with a metal tie. Make slits to let steam escape.
Paper plates and cups	Use for short-term cooking/warming only. Do not leave your microwave unattended while cooking.
Paper towels	Use to cover food for reheating and absorbing fat. Use with supervision for short-term cooking only.
Parchment paper	Use as a cover to prevent splattering or a wrap for steaming.
Plastic	Use only if labeled “Microwave Safe.” Follow the manufacturer’s instructions. Some plastic containers soften as the food inside gets hot. “Boiling bags” and tightly closed plastic bags should be slit, pierced, or vented, as indicated on the package.
Plastic wrap	Use microwave-safe only. Use to cover food during cooking to retain moisture. Do not let plastic wrap touch food.

MATERIAL	REMARKS
Thermometers	Use microwave-safe only (such as meat and candy thermometers).
Wax paper	Use as a cover to prevent splattering and retain moisture.

### Materials to be avoided

MATERIAL	REMARKS
Aluminum foil	May cause an electric spark. Transfer food into microwave-safe dish.
Aluminum tray	May cause an electric spark. Transfer food into microwave-safe dish.
Food carton with metal handle	May cause an electric spark. Use a microwave-safe dish instead.
Metal or metal trimmed utensils	Metal shields the food from microwave energy. The metal trim may cause arcing.
Metal twist ties	May cause an electric spark and could cause a fire in your microwave.
Paper bags	May cause a fire in your microwave.
Plastic foam	Plastic foam may melt or contaminate the liquid inside when exposed to high temperature.
Textiles	Hot pads, blankets, clothes or others may cause burns or a fire.
Wood	Wood will dry out when used in your microwave and may split or crack.

## Setting up your microwave

- 1 Remove your microwave and all materials from the carton and the microwave cavity.
- 2 Examine your microwave for any damage, such as dents or a broken door. Don't install or use your microwave if you find any damage.
- 3 Remove any protective film from the microwave cabinet surface, the door, and the control panel.

**CAUTION:** Don't remove the light brown or white plastic cover in the microwave cavity. This cover protects the magnetron.

- 4 Place your microwave on a level surface that provides enough open space for the air vents.

**Notes:**

- A minimum clearance of 3 in. (7.5 cm) is required between your microwave and any adjacent walls. One side must be open.
- Leave a minimum clearance of 12 in. (30 cm) above your microwave.
- Don't remove the legs from the bottom of your microwave.
- Blocking the air vents can damage your microwave.
- Place your microwave as far away from radios and TVs as possible. Operation of your microwave may cause interference to your radio or TV reception.

- 5 Plug your microwave into a standard household outlet. Make sure that the voltage and the frequency is the same as the voltage and the frequency on the rating label.

**CAUTIONS:**

- Don't mount your microwave under a cabinet.
- Don't install your microwave over a range cooktop or other heat-producing appliance. If installed near or over a heat source, your microwave could be damaged and the warranty would be voided.

## Installing the turntable

**Notes:**

- Never place the glass tray upside down. The glass tray should never be restricted.
- Both the glass tray and turntable ring must always be used during cooking.
- Always place all food and containers of food on the glass tray for cooking.
- If the glass tray or turntable ring cracks or breaks, contact your nearest authorized service center.

- 1 Place the turntable ring assembly in the round depression in the bottom of your microwave so that it turns freely.
- 2 Place the glass tray (flat side up) on the turntable assembly so that the hub engages the turntable shaft in the bottom of your microwave. The glass turntable shouldn't turn freely when it is correctly installed.

## Using your microwave

### Setting the clock

**Note:** If the clock isn't set, it won't function when powered. During the process of setting up the clock, if you press  (stop/clear) or make no changes within in one minute, the oven exits the setting.

- 1 Plug the power cord into an outlet. *0:00* flashes on the display and the buzzer sounds once.
- 2 Press  (kitchen timer/clock) twice. The hour flashes on the display.
- 3 Turn the adjustment knob to select the hour. You can select from **00:05** to **95:00**. The hour you select appears on the display.
- 4 Press  (kitchen timer/clock). The minutes flash on the display.
- 5 Turn the adjustment knob to select the minutes. You can select from **0** to **59**. The minutes you select appear on the display.
- 6 Press  (kitchen timer/clock) to confirm the setting. The: symbol flashes on the display.

### Using the kitchen timer

- 1 Press  (kitchen timer/clock) once. *00:00* flashes on the display.
- 2 Turn the adjustment knob to select the amount of time. You can select from **1** to **95** minutes. The time you select appears on the display.
- 3 Press  (start/+30sec.) to confirm the setting. When the time reaches 0, the buzzer sounds five times and the display shows the current time.

**Note:** While the kitchen timer is running, you can't program your microwave.

### Cooking in your microwave

- 1 Press  (microwave). *PL10* appears in the display.
- 2 Press  repeatedly or turn the adjustment knob to select the power level. You can select between 100% and 10%. The power levels (*PL10*, *PL9*, *PL8*, *PL7*, *PL6*, *PL5*, *PL4*, *PL3*, *PL2*, and *PL1*) appear in sequence on the display.

The available power levels are:

	1 TIME	2 TIMES	3 TIMES	4 TIMES	5 TIMES	6 TIMES	7 TIMES	8 TIMES	9 TIMES	10 TIMES
Power	100%	90%	80%	70%	60%	50%	40%	30%	20%	10%
Display	PL10	PL9	PL8	PL7	PL6	PL5	PL4	PL3	PL2	PL1

- 3 Press  (start/+30sec.) to confirm the setting.

- 4 Turn to adjust the cooking time between 00:05 and 95:00.

When you turn the knob to set the cooking time, each click of the knob add a specific amount of time.

When you start turning the knob, each click adds 5 seconds.

When you reach one minute on the timer, each click adds 10 seconds.

After the timer reaches five minutes, each click adds 30 seconds.

AMOUNT OF TIME	TIME ADDED WITH EACH CLICK
0 to 1 minutes	5 seconds
1 to 5 minutes	10 seconds
5 to 10 minutes	30 seconds
10 to 30 minutes	1 minute
30 to 95 minutes	5 minutes

- 5 Press  (start/+30sec.) to start cooking.

**Note:** When setting your microwave, if you press  (stop/clear) or if you don't enter a setting within one minute, your microwave goes back to the former setting automatically.

## Cooking quickly

**Note:** When using the auto menu or defrost by weight function, you can't increase the cooking time.

- 1 In standby mode, press  (start/+30sec.) to cook at 100% power for 30 seconds. Each time you press , the time increases by 30 seconds. The maximum cooking time is 95 minutes.
- 2 In standby mode, turn the adjustment knob left to select the cooking time, then press  (start/+30sec.) to start cooking. Your microwave cooks at 100% power.
- 3 While your microwave is cooking or when you are using the time defrost function, press  (start/+30sec.) to increase the cooking time.

## Using the Auto menu

Your microwave has nine pre-programmed cooking modes.

- 1 In standby mode, turn the adjustment knob right to choose the menu from A-1 to A-9 or turn left to choose the menu from A-9 to A-1. The auto menu number appears in the display.
- 2 Press  (start/+30sec.) to confirm your menu selection.
- 3 Turn the adjustment knob to choose the weight of food.
- 4 Press  (start/+30sec.) to start cooking. When cooking is done, the buzzer sounds five times.

See [Auto menus](#) on page 15.

**Auto menus**

<b>MENU</b>	<b>AMOUNT</b>	<b>DISPLAY</b>
A1 Popcorn	1.75 oz. 3.0 oz. 3.5 oz.	1.75 3.0 3.5

A8 Soup	1 cup (8 oz.) 2 cups 3 cups	1 2 3
A9 Reheat	9 oz. 12 oz. 18 oz.	9 12 18

## Popping popcorn in your microwave

- 1 When selecting 3.0 or 3.5 oz. of popcorn, we suggest that you fold down a triangle on each corner of the bag before cooking, as shown.

- 2 When the popcorn bag expands and no longer rotates properly, press **||** (stop/clear) once, open the oven door, then adjust the bag position to ensure even cooking.
- 3 Press **▶** (start/+30sec.) to resume cooking.

## Defrosting in your microwave

### Defrosting by weight

- 1 Press **⏻** (defrost) once. *dEF1* appears on the display.
- 2 Turn the adjustment knob to select the weight of the food. The weight range is 4 to 54 oz.
- 3 Press **▶** (start/+30sec.) to start defrosting.

### Defrosting by time

**Note:** The defrost power level is PL 3. You can't change it.

- 1 Press **⏻** (defrost) twice. *dEF2* appears on the display.
- 2 Turn the adjustment knob to select the cooking time.
- 3 Press **▶** (start/+30sec.) key to start defrosting.

## Using multi-stage cooking

You can set up a two-stage cycle to cook your food. For example, you can defrost a meal, then cook it.

In this example, the food is defrosted for five minutes, then 80% power for 7 minutes.

**Note:** Auto cooking cannot be used with multi-stage cooking.

- 1 Press **⏻** (defrost) twice. *dEF2* appears on the display.
- 2 Turn the adjustment knob to set the defrost time to five minutes.
- 3 Press **⌚** (microwave) once. *PL10* appears on the display.
- 4 Turn the adjustment knob to set the power level to 80%. *PL8* appears on the display.
- 5 Press **▶** (start/+30sec.) to confirm.

- 6 Turn the adjustment knob to set the cooking time to seven minutes.
- 7 Press  (start/+30sec.) to start cooking.

### Using the energy saving (Eco) mode

Energy saving (Eco) mode turns off the LED display to save power.

- In standby mode, press  (stop/clear) for less than three seconds. The display turns off and your microwave enters power saving mode.
- To exit the power saving mode, press any button, then open the door. The display turns on and the buzzer beeps once.

**Note:** Energy saving mode only works if the door is closed and the child lock function is turned off.

### Checking the time and power level

- While cooking, press  (microwave). The current power level appears on the display for three seconds.
- While cooking, press  (kitchen timer/clock). The current time appears on the display for three seconds.

### Using the child-lock

- To lock your microwave — Press and hold  (stop/clear) for three seconds. Your microwave sounds a long beep to indicate that the lock is turned on.
- To unlock your microwave — When your microwave is locked, press and hold  (stop/clear) for three seconds. Your microwave sounds a long beep to indicate that lock is turned off.

### Turning off the buzzer

- 1 In standby mode, press and hold  (kitchen timer/clock) for three seconds. A long beep sounds and the buzzer is turned off.
- 2 To turn the buzzer back on, press and hold  (kitchen timer/clock) for three seconds. A long beep sounds and the buzzer is turned back on.

### Resetting the turntable

If the turntable isn't in its initial position when cooking is done, the turntable enters the turntable reset function. During the reset, the lamp, fan, and turntable continue working, and  appears on the display.

When the reset function is complete, your microwave stops cooking and the buzzer sounds five times to indicate cooking is done.

**Note:** The turntable reset function only works at the end one completed cooking cycle. If you pause cooking or open the door, the function doesn't work.
