Thunderbolt 3 6-Slot SD Card Reader

Read 6 SD Cards Simultaneously

IOGEAR's Thunderbolt 3 6-Slot SD Card Reader provides simultaneous access to six memory cards through a single, ultra-high-speed cable. The Card Reader maximizes efficiency and is an excellent companion for photographers and videographers or other professionals who use multiple SD cards for storage while on-the-go.

Turbo Charged SD Card - UHS-II & SD 4.0

The Thunderbolt 3 6-Slot SD Card Reader supports the latest professional cameras as it complies with the SD card 4.0 specification and features UHS-II ultra-high speed slots. The reader is capable of read/write speeds of up to 312/260 MB/sec respectively, which is nearly 3Xs the performance of a UHS-I SD memory card. This speed increase boosts the efficiency and productivity of professionals such as photographer and videographers, saving you time and money.

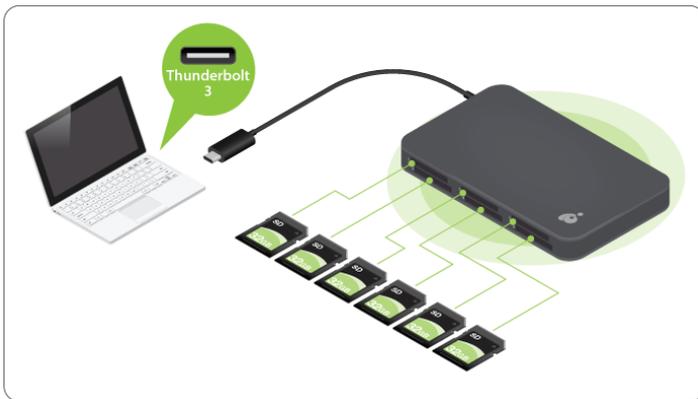

Ultra-Fast File Transfers

Quickly connect your Thunderbolt 3-enabled MacBook Pro or tablet to access and transfer files to and from multiple SD cards with data transfer rates reaching speeds to 40 Gbps. The Card Reader is also compatible with any USB-C equipped laptop or tablet and will transfer files at speeds up to 5 Gbps.
