## ENGLISH

Thanks for choosing Polar! In this guide we'll walk you through the basics of using H10, your choice for all-round training, even for swimming.

You can download the full-length user manual and the latest version of this guide at **support.polar.com**. For more help, there are some great video tutorials you may want to check out.

Wearing the heart rate sensor

1. Moisten the electrode area of the strap (picture 1).
2. Fasten the strap around your chest and adjust the strap to fit snugly.
3. Attach the connector (picture 2).

ⓘ *After training, detach the connector and rinse the strap under running water to keep it clean.*

Getting started

You can use your Polar H10 with dozens of leading fitness apps including Polar Beat, as well as with many Polar products and gym equipment. Polar H10 is compatible with a number of smart phones, such as iPhone 4S and later and selected Android devices. Check all the compatible products and devices at **support.polar.com**.

To get started with your H10, please pair it with the app or the Polar product first. For more detailed instructions, see the the app manufacturer's manual or the user guide of your Polar product.

Please note that the heart rate signal your H10 sends doesn't pass through the human body. Therefore you shouldn't keep the receiving device in a backpack, for example, but somewhere in front of you.

Caring for your heart rate sensor

Connector: To preserve battery life and prevent snap oxidation, detach the connector from the strap after every use and wipe it dry with a soft towel.

Strap: Rinse under running water after every use. Wash regularly. Check the label on your strap for detailed washing instructions.
Remember, the strap doesn't last forever; it wears out like any other garment you wear and wash regularly.

For more detailed caring instructions, see the full user manual at **support. polar.com**.

Changing the battery is easy

1. Lever the battery cover open by using a small flat-headed tool. (picture 3).
2. Remove the old battery from the battery cover.
3. Insert the new battery (CR2025) inside the cover with the negative (-) side outwards.
4. Align the ledge on the battery cover with the slot on the connector and press the battery cover back into place (picture 4). You should hear a snap.

For more detailed instructions, see the full user manual at **support.polar. com**.

⚠ *For safety reasons, please make sure you use the correct battery (CR2025).*

Materials

Connector	Polyamide
Strap	38% Polyamide, 29% Polyurethane, 20% Elastane, 13% Polyester
