

Rechargeable battery safety

Incorrect battery use may result in battery leakage, overheating, or explosion. When using batteries, make sure that you follow these instructions:

- Keep batteries out of reach of children.
- Do not heat, open, puncture, mutilate, or dispose of batteries in fire.
- If a battery leaks, remove the battery, taking care to keep the leaked fluid from touching your skin or clothes. If fluid from the battery comes into contact with skin or clothes, flush skin with water or remove the clothing immediately. Before inserting a new battery, thoroughly clean the controller with a damp paper towel.
- Do not allow metal objects to touch the battery terminals, because they can become hot and cause burns. For example, do not carry the battery in a pocket with keys or coins.
- Remove the battery when the product will not be used for an extended period of time.

Package contents

- Rechargeable battery pack
- Play and charge cable
- *Quick Setup Guide*

Setting up

Setting up the rechargeable battery pack

- 1 Press the tab on the top of the controller's battery compartment cover, then and pull down to detach the original battery from the controller.

- 2 Insert the rechargeable battery pack into the battery compartment, then press it in to lock it into place.

- 3 Turn on your wireless controller.

Charging the rechargeable battery pack

Charge your battery pack before its first use and whenever it is drained.

- 1 Insert the charging plug into the charge port on the front of your wireless controller.
- 2 Connect the USB plug to any USB port of your Xbox 360.
- 3 Turn on your console.

The charge indicator on the front of the plug glows red as the battery pack charges. When the light glows green, the battery pack is fully charged.

Notes:

- Fully charging the battery can take up to 7 hours using the play and charge cable.
- The battery pack may become warm during charging or use. This is normal and does not indicate a problem.
- It can take from three to five full charge cycles for the battery pack to achieve its full capacity.

Cautions:

- Do not touch the metal terminals on the play and charge cable or rechargeable battery pack with your fingers or allow metal parts to touch them. Doing so may damage them.
- If the battery pack is unused for a long time, it may lose its charge, so you must recharge the battery pack.
- The battery pack has a limited life. The amount of play time will decrease as it ages or after many recharge cycles. The battery pack should be replaced when play time becomes too short or when it can no longer be charged.

Troubleshooting

If the controller does not work when using the rechargeable battery pack:

- Check the charge level of the battery pack. Charge until the green charge indicator glows.
- Make sure that the battery pack is inserted correctly.
- Test the controller using AA batteries. If the controller still does not work, refer to the controller's user manual for more troubleshooting tips.

Charge Indicator does not glow:

- Make sure that the charging plug is completely inserted into the charge port.
- Check the USB plug connections.
- Make sure that the console is turned on.
