CHARGING YOUR PROJECTOR

NOTE: Use only the included AC power adapter.

- 1 Connect the USB charging cable from the projector's charging port to the AC power adapter.
- 2 Plug the AC power adapter into a power outlet. The charging indicator lights up red while charging, then turns green when finished.

- To check your battery level, press (power) briefly:

Charging Indicator	Battery Status
Green	80-100%
Yellow	31-79%
Red	0-30%

CONNECTING YOUR PROJECTOR

- 1 Select the cable (and adapter, if needed) that is compatible with your device's output port.
- 2 Connect the cable end labeled **BEAM** to your projector's **MHL/HDMI** port.
- 3 If needed, connect an adapter to the cable.
- 4 Connect the other end of the cable or adapter to the device from which you want to play video.

Apple® iOS Devices

HDMI to Micro HDMI cable

Lightning® digital AV adapter
(not included)

OR

30-pin digital AV adapter
(not included)

Micro USB

Micro USB to
Micro HDMI cable

OPTIONAL

Connect if your device has an 11-pin micro USB port.

USING YOUR PROJECTOR

TIP: For the best picture, use the projector in a dark room or at a small size in a brighter room.

1 Connect your device to your projector. See "CONNECTING YOUR PROJECTOR" for instructions.

2 Place the projector on a hard, flat, and steady surface.
OR
Unfold and clip the tripod adapter (included) to the projector, then connect it to your tripod.

NOTES:

- Make sure that the projector has enough ventilation. Do not cover the projector.
- Keep the projector stable. Do not walk around with the projector while in use.

3 Press and hold (power) for three seconds to turn on the projector. After turning on your projector, it displays "waiting," then mirrors your device's screen.

4 Aim the lens at a screen or blank wall, then turn the **FOCUS** dial to bring the projection into focus.

5 Use your connected device to control playback.

6 Press to cycle the projector's volume level between low, medium, high, and mute. Make sure that your connected device's volume is set to at least 50%.

Note: You can also play audio through Bluetooth speakers or headphones (not included).

7 To rotate the screen 180°, press and hold for 5 seconds.

8 When finished, press and hold (power) for three seconds to turn off the projector.

TROUBLESHOOTING

The image blinks or changes color

- Recharge your projector or connected device.
- The screen may blink if your phone receives a text message or call while it is connected.

The image is distorted

- Point your projector straight at the wall, or try different positions.

The image dims or turns off

- Turn off your source device's screen timeout.
- Turn off your source device, then turn it back on.
- If your projector is not connected to a device, it turns off automatically.

Projector does not display image/video

- Make sure that your cable connections are correct and secure.
- Make sure that your projector and connected device are fully charged.
- Some apps may not support image projection.
- If your device uses micro USB, try connecting the 5-to 11-pin adapter. **DO NOT** force the adapter to fit into your device's port.

- Check the documentation that came with your device to determine whether it can display content through MHL.

Projector does not play sound or is too quiet

- Turn up the volume on your connected device.
- Press to cycle the volume level to high.
- Play audio through Bluetooth speakers or headphones (not included).

SAFETY INFORMATION

- Do not squeeze or drop the projector.
- Do not store or use the projector in an extremely hot area, such as a parked car.
- Do not disassemble or modify the projector.
- Do not block the vents on the side or top of the projector.
- Do not expose the projector to extreme vibrations. It may damage internal components.
