

# Arlo Wire-Free Smart Security Lights

## No cords. No wires. No worries.

Arlo® Security Light is a 100% wire-free, weather-resistant, super-bright LED light. It works right out of the box with no extra costs or monthly fees. Easily customize your light settings from anywhere and get instant alerts when motion is detected. Automate your Arlo Security Light to work intelligently by itself or with your Arlo security camera systems.

If you already have an existing Arlo security camera system, you won't have to upgrade your current service plan. Add as many lights as you need to help cover even more angles.

### 100% Wire-Free

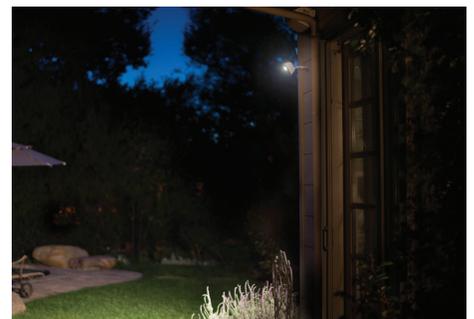

Free of power cords and wiring hassles. Place it anywhere. Easily mount security light on walls, eaves, gazebos, and more. Set up your light anywhere around your home - whether on your front porch, in your backyard, or around any other corners.

### Fully Customizable

Make it flash on or off, change colors, adjust beam width & more. You can set the light to flash red when it detects motion. This will draw attention from neighbors if anyone is sneaking around your home. Add more Arlo Security Lights to illuminate even more areas and easily synchronize light patterns.

### Works with Arlo Camera Systems

Make the most out of your existing Arlo security cameras by creating an ecosystem of Arlo devices with automated interactions. Arlo Security Light and Arlo security cameras work together for added security while you're home or away. Set your Arlo cameras to record when the light detects motion.

# Arlo Wire-Free Smart Security Lights

## Features

### 100% Wire-Free

Free of power cords & wiring hassles. Place it anywhere

### Fully Customizable

Make it flash on or off, change colors, adjust beam width & more

## SYSTEMS

---

The Arlo Security Light system is a simple, smart, wire-free lighting solution for outdoor use. The Arlo app lets you remotely adjust the brightness, beam width, colors, and flashing patterns. Schedule your light for when you are at home, work, or on vacation. Power it with the included long-lasting rechargeable battery or keep it plugged in with either Arlo® Solar Panel or Arlo® Outdoor Adapter (sold separately). Integration with IFTTT enables custom interactions with other smart home devices. Arlo Security Light works with Amazon Alexa® to let you turn your light on and off using a simple voice command.
