

Wheel Well / Underbody RGB LED Lighting Kit

If you are looking to give your off-road vehicle or boat a little extra sex appeal, Stinger's new universal underbody kit adds illuminated RGB lighting to any area you desire. The plug-and-play installation makes adding this eye-catching feature easy, with no soldering or crimping needed. Bluetooth enabled you can control the lights via a mobile app choosing specific colors, dynamic modes, or really get the party started with the music-controlled mode which sets the LEDs to change with your music.
