

Wireless Lightning Vlogging Lapel Microphone with Charging Case

.....

Produces clear broadcast quality sound for podcasting, vlogging, live streaming, YouTube productions, TikTok videos and more.

Overview:

Aluratek's Wireless Lightning Lavalier Lapel Microphone with Charging Case is a professional grade wearable microphone designed to record your voice in broadcast quality sound when podcasting, vlogging, live streaming, creating YouTube productions, TikTok videos and more.

The wireless lav mic is Plug-n-Play ready and compatible with iPhones with a Lightning port. The mic is easy to use, simply plug the lightning adapter into your phone and the mic is ready to record. No apps or Bluetooth syncing required. The lav mic features a 360° omnidirectional sound pick-up and reduces ambient background noise. The microphone includes a sturdy clip that easily clips to a shirt, collar or tie for hands-free convenience and included a wireless charging case.

NOTE: the wireless mic is only compatible with the Lightning interface and not compatible with USC-C iPad series. The mic does not support phone calls and online chatting.

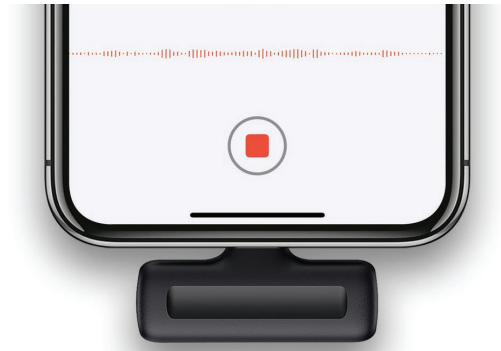

Features:

- Produces clear broadcast quality sound for podcasting, vlogging, live streaming, YouTube productions, TikTok videos and more.
- Capture clear 360° audio with the built-in omnidirectional microphone and ambient background reduction for crisp and clear sound recordings
- Easy Plug-n-Play, no apps or Bluetooth syncing required
- Compatible with iPhone's and tablets with the lightning port
- Transmitter and receiver that will automatically connect once the lightning receiver is plugged into the iPhone
- Features a durable clip to easily clip to your shirt, collar or tie
- No cords - move freely while recording up to 60 ft. (18m)
- Rechargeable case (via included USB-C charging cable)
- Limited 1 Year Warranty

Long Distance Wireless Reception

The mic's 2.4GHz frequency allows for long distance recording up to 60 ft (18m) from the receiver and is compatible all iPhones and iPads with the lightning port. Perfect for vlogging, podcasting, game streaming, social media productions and more.

Easy to Use

AWLM01F includes a transmitter and receiver that will automatically connect once the lightning receiver is plugged into the iPhone. No Apps or Bluetooth syncing required.

Noise Reduced Recordings

The mic is designed with 360° omnidirectional sound pick-up that reduces ambient background noise so you can record a quality voice track even in a noisy environment. The mic simply clips to a shirt, lapel or tie for hands-free convenience.

Wireless Charging Case

The Wireless Vlogging Lapel Microphone includes a handy and portable charging case that fully charges the transmitter up to 6 times over on a full charge. Includes a USB-C charging cable to charge the case.
