H900M

密閉型オーバーイヤーヘッドホン

Premium closed architecture
over-ear headphones

その音があるがままに。 Since 1946.

Pure Sound. Since 1946.

The H900M are sleek, durable over-ear headphones designed for High Resolution Audio. With wide frequency 50mm high power drivers and precision aluminum housings, these signature headphones are the perfect companion to enjoy peerless music. Their advanced drivers deliver accurate treble, clear and open mid-range and deep, smooth bass at any volume for a perfectly balanced sound.

Feature highlights

Supports High Resolution Audio

Closed acoustic architecture with custom designed $\Phi 50$ mm high power drivers

Sturdy yet lightweight aluminium housing provides a perfect balance between durability and wearability

Iconic broad headband design distributes headphone weight evenly

High Resolution Audio

High Resolution Audio (HRA) files bring you as close as possible to the original studio master recording, with a wide frequency bandwidth and a high dynamic range that exceeds the capabilities of the 16bit/44.1kHz CD format. Onkyo has taken an end-to-end approach that encompasses the Onkyo HF Player app, Onkyo Music downloading service and the acoustic design of Onkyo's HRA headphones. This ensures no weak links in the audio chain and allows Onkyo to faithfully reproduce complex HRA files, enabling you to hear every subtle detail of the original studio recording.

Pure precision

To create the purest sound, optimized $\Phi 50\text{mm}$ high power drivers are used inside a closed back architecture to offer both high levels of passive isolation and pristine sound for the best possible listening experience. An advanced headphone housing construction further eliminates vibration to sharpen treble response, while all other parts are engineered for precision and performance to create clear, dynamic and natural bass.

Premium craftsmanship

A modern gold and black design echoes the looks of traditional musical instruments, emphasizing the H900M's ability to deliver an unforgettable listening experience. A unique broad headband design distributes headphone weight evenly, and synthetic leather improves sweat and moisture resistance when used outdoors. Around the ears are a premium soft synthetic leather coupled with memory foam to ensure a contoured and comfortable acoustic seal for excellent passive noise isolation. This keeps the details of music in, and unwanted noise out.

Specifications

Product name	H900M Premium closed architecture over-ear headphones
Model number / EAN	H900MB/00; 6925970751148 H900MB/11; 6925970751155
Model number / UPC	H900MB/27; 889446100570

[Sound]

Driver diameter	$\Phi 50\text{mm}$ high power driver
Acoustic architecture	Closed
Frequency response	5Hz - 40kHz
Sensitivity	105dB/mW
Impedance	16ohms

[General]

Cable	Detachable 1.3m long low impedance, oxygen-free copper twisted cable
Microphone	In-line

[Packaging]

Net weight	236g
Gross weight	522g
Dimensions (WxHxD)	240 x 285 x 120mm
