

Neckband Product Description

Gravity Bluetooth Neckband Adaptor + Earbuds

GO Versatile

Instantly Wireless. Plug-in Any Earbud, Any Brand (or use those included)

Full Description:

Turn wired to wireless with the JLab Gravity Bluetooth Neckband Adaptor. Plug in any earbuds, or use the included JBuds Pro, with the Gravity Neckband that sits comfortably around your neck. Connect to Bluetooth on your device and you can GO anywhere wirelessly with up to 10 hours of playtime. All the controls you need are found on the neckband so you can pump up the volume, play, pause, or seamlessly make calls at the drop of a hat. It's the most versatile headset yet.

Wireless Transformation

Give your wired earbuds a full transformation to wireless, the Gravity features Bluetooth 4.1 allowing you to connect to your device from up to 30 feet away and continue hands free while you finish painting a room, washing your car, or simply hanging out by the pool. Easily hide your earbud wires with the Gravity's simple wire management system, completing the transformation from wired to wireless. Talk about an earbud makeover.

Talk, Talk, Talk

Designed with phone calls in mind, the digital microphone is built in to the neckband for easy access and outstanding voice clarity. Seamlessly take (or reject) calls while you briskly walk to your next business meeting, run through campus, hop into a cab, or jump on a flight with the easy to use button controls.

Traveling Battery Life

With a 10-hour music playtime you can listen to all your favorite tunes for a roundtrip flight from California to New York. Or keep chatting with up 12 hours of talk time. Recharge and get back at it. It's perfectly adaptable for your crazy, can't stop, won't stop life.

Light as Air

Like wearing a scarf or hat that you forgot was there, the Gravity is made of medical grade silicone rubber so it will sit comfortably around your neck. Forget any stiff, immovable, behind-the-neck headsets you've seen before, these will settle comfortably right in place. With their included JBuds Pro, you can choose from eight different size gel tips to find the right fit in your ear and GO.

Convenient Controls

For any busy life, all your controls are located on the neckband: Volume, play, pause, track forward, and track back. Even activate Siri or Google Assistant. No matter when or where, you're ready to GO.

Signature C3 Sound

With the JBuds Pro already in place in the Gravity, you're guaranteed our signature C3 sound. Finely tuned, high-performance titanium drivers deliver a clean, crisp sound for highs, lows and every range in between. Hi-fi noise-isolating design keeps you focused on the music and not on your noisy subway neighbor.
