WELCOME

Thank you for purchasing the Supreme Bluetooth Voice Language Translator. Our voice language translator is a powerful translation device which can instantly translate what you say in real time and play it back to locals in their native language. They can then reply to you and what they say will instantly be translated back to your earphone. It is now easy to carry on a conversation in a language that you have never spoken.

HOW TO WEAR

The unit comes with 3 sizes of Ear Gels for an optimal user experience. Try each of the Ear Gel sizes to pick the one that fits best for you. The best fit should feel tight and secure in your ear without causing discomfort.

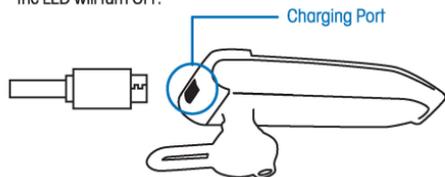

EARPHONE CHARGING

It is recommended to fully charge the battery prior to first time use. It usually takes around 2 hour for the earphone to fully charge.

Plug the supplied USB Cable into the earphone charging port and connect the other end of the cable to a USB port or USB Wall Charger.

During charging, the LED Status Light will illuminate RED which indicates that the unit is charging. When charging is completed the LED will turn OFF.

EARPHONE SPECIFICATIONS

Bluetooth Version: 4.2

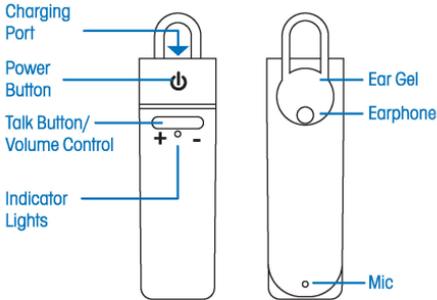

Transmission Range: 33 Feet (10m)

Battery: 90mAh Li-Polymer

DC 5V, Approx 2 Hour Charge Time

Use Time: Up to 5 Hours / 60 Hours Standby

START TRANSLATING

SUPREME INTELLIGENT VOICE LANGUAGE TRANSLATOR APP

LANGUAGE APP REQUIREMENTS

To operate properly our Supreme Intelligent Voice Language Translation App requires a device running the latest versions of iOS or Android.

Since our translation app is always learning and adding new words, all translations are done in real time which requires you to have an active Internet Data Plan or Wifi Connection in order for the app to work.

LANGUAGE TRANSLATOR APP FUNCTIONS

The Supreme Language Translator App is a powerful app which includes the following functions.

Face to Face Language Translation Mode

This translation mode is perfect for traveling. You can speak into your earphone and the words will be translated both verbally and visually to your device screen. The person can then tap on the device to speak in their language and it will automatically be verbally translated to your earphone, while also being visually displayed on the device.

Language Tutor

The Face to Face translation mode can also be utilized to help you practice a new language you are learning.

Group Translation Mode

This mode allows multiple users to easily chat with each other in a group setting while each speaking their own language. Using the App, simply set up a group translation conversation, invite people and start talking. Whether it's a meeting, dinner, conference or even from across the world, you can communicate with a group of people in real-time, each in their own language.

Instant Language Translation Mode

This mode allows for 2 earphone users to easily chat over the app with each other in their own language, whether they are standing next to each other or half a world away. Just set up a private chat and start talking, and the app will translate what you say to each other automatically.

Battery Optimizer/Battery Meter

Helps elongate and optimize your battery life while using your language translator earphone. The battery meter display helps track the remaining battery percentage and usage time.

Earphone OTA Software Upgrade

Easy over the air updates for your earphones. Always be up to date with the latest software releases.

Record Function

Built in Audio record features lets you record and capture conversations.

CONNECTING via BLUETOOTH for Apple iOS devices

Turn on the earphone by Long Pressing the Power Button until the LED fast flashes in BLUE.

Go into the Settings Menu → Bluetooth Menu. Make sure Bluetooth is toggled ON.

Go to "OTHER DEVICES" at the bottom of the Bluetooth Menu and look for "Supreme Earphone" in the list

Tap "Supreme Earphone" in the list to connect your unit to Bluetooth. Your unit should now be connected.

Once connected, "Supreme Earphone" will appear under "MY DEVICES" with the word "Connected" listed on the right side.

Your unit is now paired and ready to use.

Downloading the Supreme Language Translator App

Using your device, find the App Store Icon and tap it to access the Apple App Store.

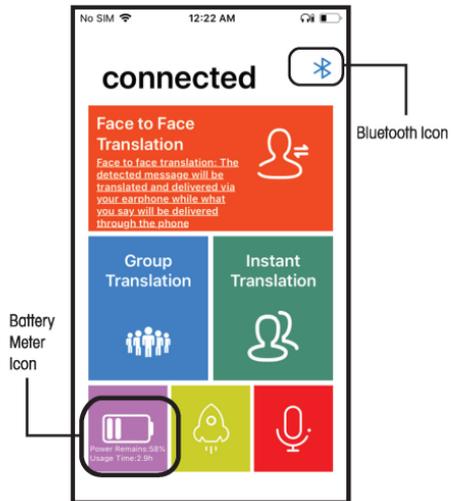

Once connected to the App Store click on the search icon and in the search box type "ST Translator" then tap search.

The "ST Translator" app should show up in the search results. Tap GET and follow the prompts to download the app to your device. Once completely downloaded the Supreme Language Translator app should appear as an Icon on your device.

Getting Started

Make sure your Supreme Translator earphone is ON and connected to your device. (Refer to "Connecting via Bluetooth" for help)

Launch the Supreme Language Translator App. On the Top right hand of the screen you will see a Bluetooth icon, this icon should be BLUE which confirms that the earphone is properly connected to the app and ready for translation. (If the BT icon is grayed out then please check that your earphone is connected via Bluetooth to your device.)

On the main screen of the Supreme Translator Language App you will see a battery icon. This icon displays and tracks the remaining battery percentage and usage time of your Language Translating Earphone.

FACE TO FACE TRANSLATION MODE

Tap the **Face to Face Translation** icon to launch Face to Face translation mode.

First Time Users Only

The first time you launch Face to Face translation mode, a few pop-up Setup Screens will display, requesting certain access that the app needs to properly work. The first is "ST Translator Would like to access the Microphone" and the 2nd is "ST Translator Would like to access Speech Recognition". Tap **OK** to both of these requests to continue.

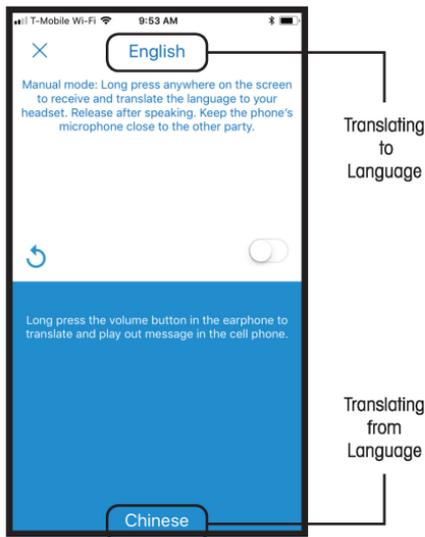

The screen layout in Face to Face translation mode is split into 2 sections. White on top and Blue on the bottom. The bottom Blue section is the original language the earphone user speaks and the top White section is language you would be translating to.

Selecting Languages

On the top of the White section you will see the current selected language you would like to translate to.

In order to change the language, just tap on the current language wording and a menu of supported languages will appear. Scroll up and down to find your desired language and tap on the desired language to select it. The selected language should now appear as the new default language on the top of the White section.

On the bottom of the Blue section you will see the current selected language you are translating from. This should be set to the language that the earphone user will be speaking.

In order to change the language, just tap on the current language wording and a menu of supported languages will appear. Scroll up and down to find your desired language and tap on the desired language to select it. The selected language should now appear as the new default language on bottom of the blue section.

Example: To translate from English to Spanish, tap the language in the Blue section and select English, then tap the language in the White section and select Spanish.

Begin Translating

Press and Hold the **TALK** Button on your earphone and speak clearly into the microphone. When you are finished speaking let go of the **TALK** button.

The words you just spoke will be verbally spoken via your device speaker in your selected translated language, so the people you are speaking to can hear it. If they did not hear it clearly, press the repeat button to verbally play out the words again.

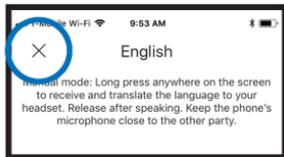

The words you spoke will be also be visually displayed in your original language in the Blue section of the device screen and in the translated language in the White section of the device screen.

The person you are conversing with can then respond in their native language by pressing down and holding anywhere on the device screen while speaking. When they are finished speaking they just let go and the spoken words will be translated back to the earphones in your original language.

For conversations in quiet areas, you can toggle On the Auto Mode which allows the user to speak in their native language without having to press down and hold the device screen when speaking. This feature is only recommended for use in a quiet environment. (Only Available on iOS Version of App)

To Exit Face to Face Translation Mode tap "X" on the top left side of the screen.

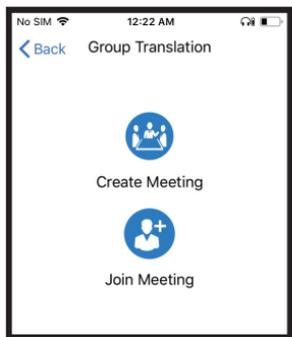

Group Translation

GROUP TRANSLATION MODE

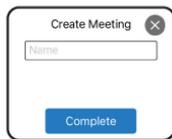

This mode allows multiple users to easily chat with each other in a group setting while each speaking their own language. Whether it's a meeting, dinner, conference or even from across the world, you can communicate with a group of people in real-time, each in their own language.

Tap the **Group Translation** icon to launch Group Translation mode. The screen layout in Group Translation mode has 2 icons. The first to create a meeting and the second to join a meeting.

Creating a Group Translation Conversation

Tap on the "Create Meeting" Icon. A popup window will appear asking you to enter your name. Type in the requested information and then tap **Complete** to create your group translation conversation.

Inviting People to Join a Group Translation Conversation Using the Translation App

On the top of the Group Translation Conversation screen you will see the meeting ID.

Simply text, email or verbally communicate the complete meeting ID to the people you would like to invite to the Group Translation conversation.

Inviting People to Join a Group Translation Conversation

Using the Web Portal

You can also invite people who do not have the Supreme translating earphone and translating app to join a group translation conversation via the Group Translation web portal.

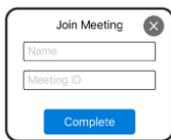

Tap the **Share** icon which will allow you to either text or email them a link to join via the web portal.

Please note web portal users can only communicate via messaging only.

Joining a Group Translation Conversation

Tap the **Join Meeting** icon. A popup window will appear asking you to enter your name and meeting ID. Enter the requested information and then tap **Complete** to be joined into the group translation conversation.

Once in the Group Translation conversation, on the top of the screen will be displayed the Meeting ID and the number of people already joined in the conversation. To see a detailed list of participants, just tap the **People** icon.

Selecting Languages

In the Group Translation conversation screen, on the bottom left hand corner you will see the current default language. Each user needs to change the language to the one they will be speaking.

In order to change the language, just tap on the language selection icon and a menu of supported languages will appear. Scroll up and down to find your desired language and tap the desired language to select it. The selected language should now appear as the new default language.

Carrying on a Group Translation Conversation

To speak during a conversation, tap and hold the **Hold to Talk** button on the device screen while clearly speaking into the earphone. When finished speaking, let go of the **Hold to Talk** button.

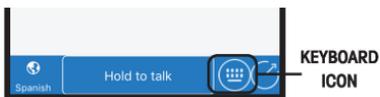

Each person in the conversation, will see the words you spoke visually displayed on their screen in both your original spoken language and their chosen translated language.

To verbally hear a translation, a user can just tap the **Speaker** icon next to each translation and it will be verbally played out via the translating earphones.

Instead of verbally speaking, a user can choose to converse by typing out what they want to say via the messaging option.

To access the messaging option just tap the **Keyboard** icon located on the right side of the Hold to Talk Button. You can then type out what you want to say and when finished tap **Return**.

You can exit messaging mode at any time and return to Verbal mode by tap the **Verbal** icon located to the right of the message box.

Leaving a Group Translation Conversation

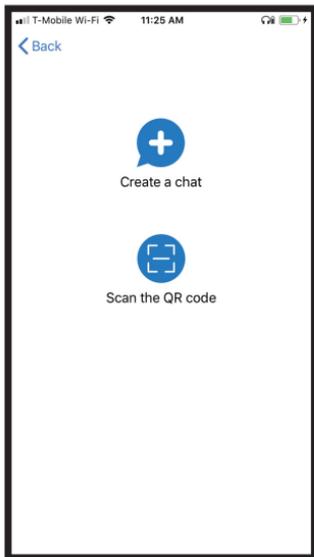

Tap the **< Back** button at anytime to leave or end a group translation conversation.

INSTANT TRANSLATION MODE

This mode is designed for 2 earphone users who want to utilize synchronous translation by setting up a private chat using the app. The Supreme Smart Language Translator app will translate what you say to each other automatically.

Tap the **Instant Translation** icon to launch Instant Translation mode. The screen layout in Instant Translation mode shows 2 icons. One for creating a chat and the second for scanning a QR code.

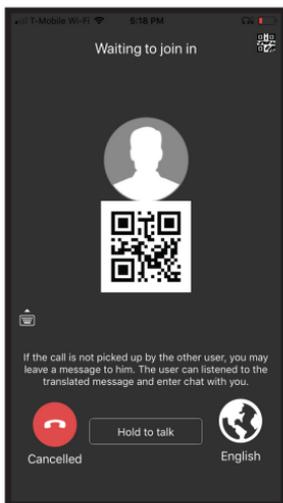

Setup up a Call

Tap on the **"Create a chat"** icon. The next screen will give a brief explanation of the function, read it and tap **OK**. You will now be in the "Waiting to Join Call" screen, which will display a QR code in the middle of the screen. (If no QR code is displayed tap on the QR code icon located at the top right corner of the screen to display the QR code.)

Text or Email QR Code

If the person you are trying to connect with is far away, you will need to send them the QR code to connect. On your device press the HOME and POWER button simultaneously to take a screenshot of the QR Code. Tap the image that appears on the bottom Left hand corner of your device to enlarge it and tap  to go into the Email/Message Pop up Screen. Select either "Message" or "Mail" to send the QR code. Follow the instructions for the method you choose to send the image. Once the image has been sent, Tap **DONE** then delete screenshot to go back into the "Waiting to Join" screen.

Once the receiver gets the QR code, they need to save it to their Photo Album.

To Accept a Call

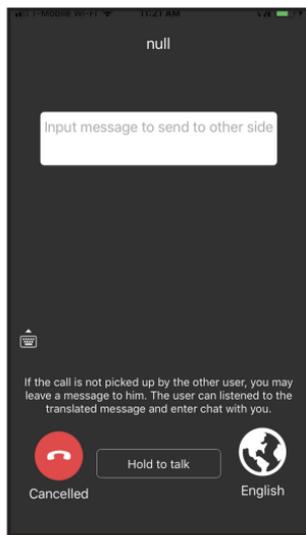

Tap on the **"Scan the QR Code"** icon. The next screen will offer a brief explanation of the function, read it and tap **OK**. You will now be in the QR code scanner screen. Go to the user with the device that is setting up the call and use the QR code scanner to scan the QR code on its display. Once the QR code is scanned you should be connected to each other.

If you recently received a QR code via text or email and saved it to your album, simply tap on the Album icon located on the top right side of the QR code scanner screen. This will bring you to your Photo Album. Select the QR code image to join the conversation.

Carrying on a Conversation

Once connected, on the bottom right corner of the screen is the current default language. Each user needs to change the language to the one they will be speaking.

In order to change the language, just tap on the language icon and a menu of supported languages will appear. Scroll up and down to find your desired language and tap on the desired language to select it. The selected language should now appear as the new default language.

Tap and hold the **"Hold to Talk"** Button on the device screen and speak clearly into the earphone. When finished speaking let go of the **"Hold to Talk"** button. The app will process what was said and say **"SENT"** as a confirmation that the translation was completed and sent.

The receiver then will hear what you said in their selected language through their earphone. They can then reply by tapping and holding the **"Hold to Talk"** Button on their device screen and speaking clearly into the earphone. The app will process what was said and say **"SENT"** as a confirmation that the translation was completed and sent. This process is repeated back and forth to create a conversation.

Sending a Message

Instead of speaking, either party can choose to converse by typing out what they want to say via the Messaging Option. To access the Messaging Option, simply tap the keyboard icon located on the left side of your screen.

Type out what you would like to say and when finished tap **"SEND"**. The app will process your message and say **"SENT"** as a confirmation that the translation was completed and sent. The receiver will then hear what you said in their selected language through their earphone.

Ending a Conversation

Tap the Red **"Canceled"** button at any time to cancel or end a call.

To Exit Instant Translation Mode tap on **"<Back"** in the launch screen.

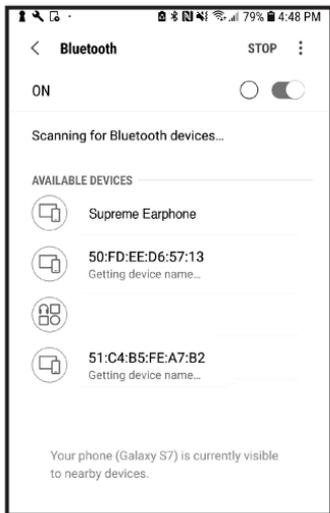

CONNECTING via BLUETOOTH for Samsung/Android Devices

Turn on the earphone by Long Pressing the Power Button until the LED fast Flashes in BLUE.

Go into the Apps Menu → Settings Menu → Connections Menu → Bluetooth Menu. Make sure Bluetooth is toggled ON.

Go to "AVAILABLE DEVICES" in the Bluetooth Menu and look for "Supreme Earphone" in the list. If you cannot find "Supreme Earphone" then touch SCAN to rescan for BT devices.

Tap "Supreme Earphone" in the list to connect your unit to Bluetooth. Your unit should now be connected.

Once connected "Supreme Earphone" will appear under "PAIRED DEVICES".

Your unit is now paired and ready to use.

Please note some Android device manufacturers use slightly varied methods for connecting devices to Bluetooth. Consult your device Owners Manual for specific instructions on connecting Bluetooth products

Downloading the Supreme Language Translator App

Using your device, find the Play Store Icon and tap it to access the Google Play Store.

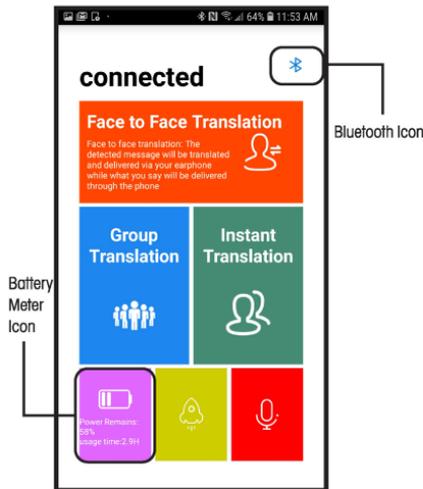

Once connected to the Google Play Store, click on the Google Play search icon and in the search box type "ST Translator" then tap search.

The "ST Translator" app should show up in the search results. Tap the "ST Translator" icon, on the next screen tap INSTALL to download the app to your device. Once completely downloaded the Supreme Language Translator app should appear as an icon under APPS menu on your device.

Getting Started

Make sure your Supreme Translator earphone is ON and connected to your device. (Refer to "Connecting via Bluetooth" for help)

Launch the Supreme Language Translator App. On the top right hand of the screen you will see a Bluetooth icon, this icon should be BLUE which confirms that the earphone is properly connected to the app and ready for translation. (If the BT icon is grayed out then please check that your earphone is connected via Bluetooth to your device.)

On the main screen of the Supreme Translator Language App you will see a battery icon. This icon displays and tracks the remaining battery percentage and usage time of your Language Translating Earphone.

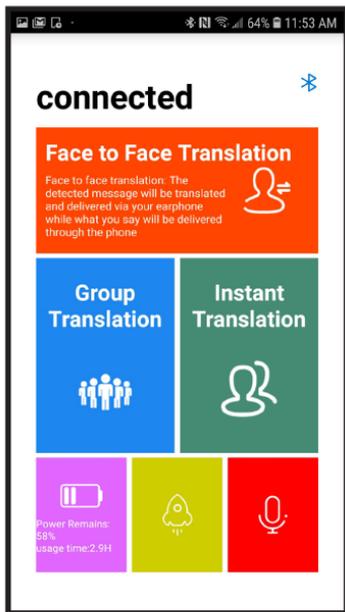

FACE TO FACE TRANSLATION MODE

Tap the **Face to Face Translation** icon to launch Face to Face translation mode.

First Time Users Only

The first time you launch Face to Face translation mode, you will usually see a pop up screen stating "WE NEED SOME ACCESS". This is for access that the app and Android will need in order to work properly together. The most common requests are for Microphone, Storage and Telephone access. Follow the onscreen prompts by tapping each access request and allow access as requested for each item.

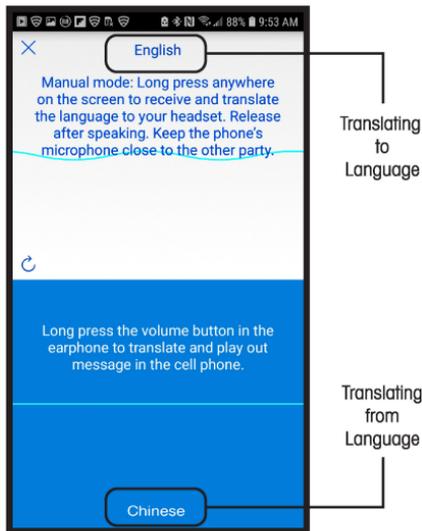

The screen layout in Face to Face translation mode is split into 2 sections. White on top and Blue on the bottom. The bottom Blue section is the original language the earphone user speaks and the top White section is language you would be translating to.

Selecting Languages

On the top of the White section you will see the current selected language you would like to translate to.

In order to change the language, just tap on the current language wording and a menu of supported languages will appear. Scroll up and down to find your desired language and tap on the desired language to select it. The selected language should now appear as the new default language on the top of the White section.

On the bottom of the Blue section you will see the current selected language you are translating from. This should be set to the language that the earphone user will be speaking.

In order to change the language, just tap on the current language wording and a menu of supported languages will appear. Scrolling up and down to find your desired language and tap on the desired language to select it. The selected language should now appear as the new default language on bottom of the Blue section.

Example: To translate from English to Spanish, tap the language in the Blue section and select English, then tap the language in the White section and select Spanish.

Begin Translating

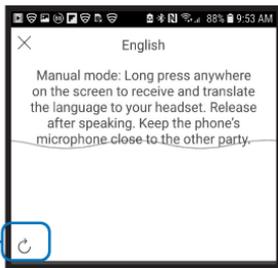

Press and Hold the **TALK** Button on your earphone and speak clearly into the microphone. When you are finished speaking let go of the **TALK** button.

The words you just spoke will be verbally spoken via your device speaker in your selected translated language, so the people you are speaking to can hear it. If they did not hear it clearly, press the repeat button to verbally play out the words again.

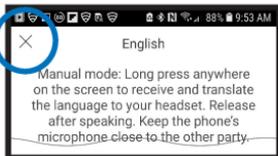

The words you spoke will be also be visually displayed in your original language in the Blue section of the device screen and in the translated language in the White section of the device screen.

The person you are conversing with can then respond in their native language by pressing down and holding anywhere on the device screen while speaking. When they are finished speaking they just let go and the spoken words will be translated back to the earphones in your original language.

REPEAT
BUTTON

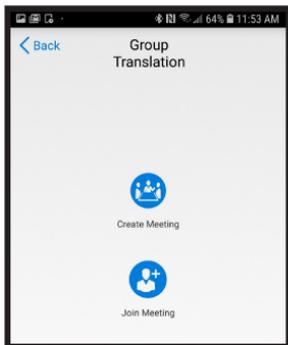

To Exit Face to Face Translation Mode tap **"X"** on the top left side of the screen.

GROUP TRANSLATION MODE

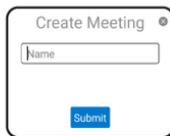

This mode allows multiple users to easily chat with each other in a group setting while each speaking their own language. Whether it's a meeting, dinner, conference or even from across the world, you can communicate with a group of people in real-time, each in their own language.

Tap the **Group Translation** icon to launch Group Translation mode. The screen layout in Group Translation mode has 2 icons. The first to create a meeting and the second to join a meeting.

Creating a Group Translation Conversation

Tap on the **"Create Meeting"** icon. A popup window will appear asking you to enter your name. Type in the requested information and then tap **Submit** to create your group translation conversation.

Inviting People to Join a Group Translation Conversation Using the Translation App

On the top of the Group Translation Conversation screen you will see the meeting ID.

Simply text, email or verbally communicate the complete meeting ID to the people you would like to invite to the Group Translation conversation.

Inviting People to Join a Group Translation Conversation

Using the Web Portal

You can also invite people who do not have the Supreme translating earphone and translating app to join a group translation conversation via the Group Translation web portal.

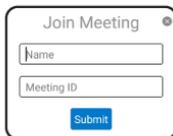

Tap the **Share** icon which will allow you to either text or email them a link to join via the web portal.

Please note web portal users can only communicate via messaging only.

Joining a Group Translation Conversation

Tap the **“Join Meeting”** icon. A popup window will appear asking you to enter your name and meeting ID. Enter the requested information and then tap **Submit** to be joined into the group translation conversation.

Once in the Group Translation conversation, on the top of the screen will be displayed the Meeting ID and the number of people already joined in the conversation. To see a detailed list of participants, just tap the **People** icon.

Selecting Languages

In the Group Translation conversation screen, on the bottom left hand corner you will see the current default language. Each user needs to change the language to the one they will be speaking.

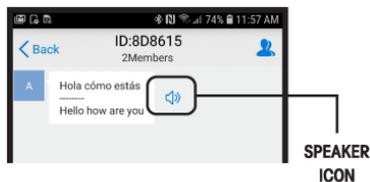

In order to change the language, just tap on the language selection icon and a menu of supported languages will appear. Scroll up and down to find your desired language and tap the desired language to select it. The selected language should now appear as the new default language.

Carrying on a Group Translation Conversation

To speak during a conversation, tap and hold the **“Hold to Talk”** button on the device screen while clearly speaking into the earphone. When finished speaking, let go of the **“Hold to Talk”** button.

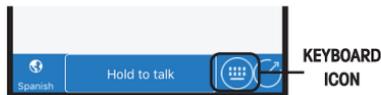

Each person in the conversation, will see the words you spoke visually displayed on their screen in both your original spoken language and their chosen translated language.

To verbally hear a translation, a user can just tap the **Speaker** icon next to each translation and it will be verbally played out via the translating earphones.

Instead of verbally speaking, a user can choose to converse by typing out what they want to say via the messaging option.

To access the messaging option just tap the **Keyboard** icon located on the right side of the Hold to Talk Button. You can then type out what you want to say and when finished tap **Return**.

You can exit messaging mode at any time and return to Verbal mode by tap the **Verbal** icon located to the right of the message box.

Leaving a Group Translation Conversation

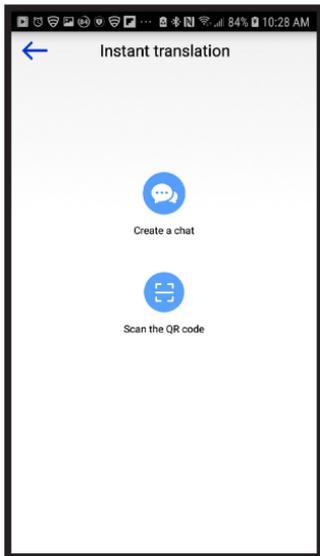

Tap the **“<Back”** button at anytime to leave or end a group translation conversation.

INSTANT TRANSLATION MODE

This mode is designed for 2 earphone users who want to utilize synchronous translation by setting up a private chat using the app. The Supreme Smart Language Translator app will translate what you say to each other automatically.

Tap the **Instant Translation** icon to launch Instant Translation mode. The screen layout in Instant Translation mode shows 2 icons. One for creating a chat and the second for scanning a QR code.

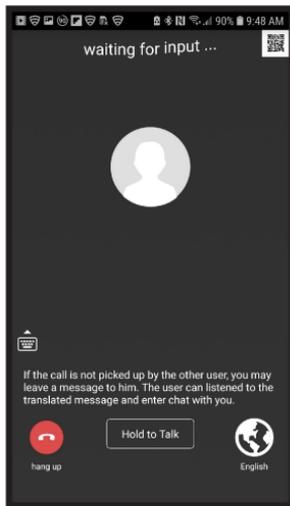

Setup up a Call

Tap on the **"Create a chat"** icon. The next screen will give a brief explanation of the function, read it and tap **OK**. You will now be in the "Waiting to Join Call" screen, which will display a QR code in the middle of the screen. (If no QR code is displayed tap on the QR code icon located at the top right corner of the screen to display the QR code.)

Text or Email QR Code

If the person you are trying to connect with is far away, you will need to send them the QR code in order to connect. Follow your device manufacturers instructions for taking screenshots, to take a screenshot of the QR Code. For Samsung devices press the HOME and POWER button simultaneously for 3 seconds to take a screenshot of the QR Code. Tap the image that appears on the bottom right hand corner of your device to enlarge it. Tap  to be redirected to the Send Image Screen. In the TO: box type the email address or mobile number to want to send the QR code to and tap SEND. Now tap the  icon located on the top left of the screen to go back to the "Waiting for Input" screen. Once the receiver gets the QR code, they need to save it to their Photo Album.

To Accept a Call

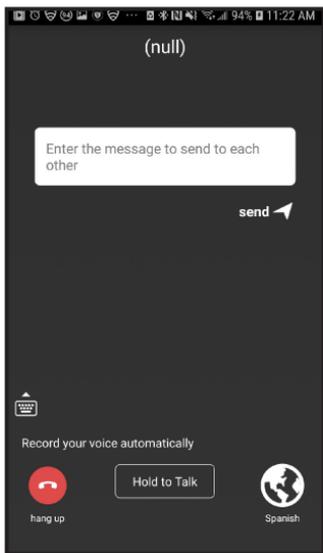

Tap on the **"Scan the QR Code"** icon. The next screen will offer a brief explanation of the function, read it and tap **OK**. You will now be in the QR code scanner screen. Go to the user with the device that is setting up the call and use the QR code scanner to scan the QR code on its display. Once the QR code is scanned you should be connected to each other.

If you recently received a QR code via text or email and saved it to your Photo album, simply tap on the Album icon located on the top right side of the "QR Code Scanner" screen. This will bring you to your Photo Album. Select the QR code image to join the conversation.

Carrying on a Conversation

Once connected, on the bottom right corner of the screen is the current default language. Each user needs to change the language to the one they will be speaking.

In order to change the language, just tap on the language icon and a menu of supported languages will appear. Scroll up and down to find your desired language and tap on the desired language to select it. The selected language should now appear as the new default language.

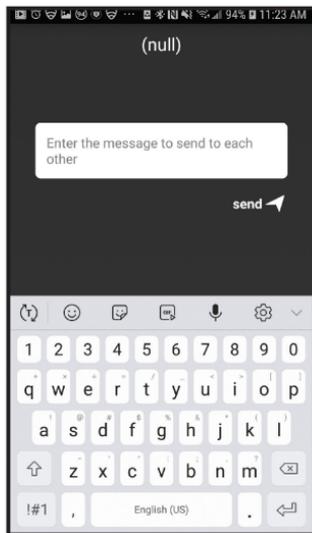

Tap and hold the **“Hold to Talk”** Button on the device screen and speak clearly into the earphone. When finished speaking let go of the **“Hold to Talk”** button. The app will process what was said and say **“SENT”** as a confirmation that the translation was completed and sent.

The receiver then will hear what you said in their selected language through their earphone. They can then reply by tapping and holding the **“Hold to Talk”** button on their device screen and speaking clearly into the earphone. The app will process what was said and say **“SENT”** as a confirmation that the translation was completed and sent. This process is repeated back and forth to create a conversation.

Sending a Message

Instead of speaking, either party can choose to converse by typing out what they want to say via the Messaging Option. To access the Messaging Option, simply tap the keyboard icon located on the left side of your screen.

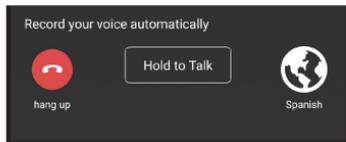

Type out what you would like to say and when finished tap **“SEND”**. The app will process your message and say **“SENT”** as a confirmation that the translation was completed and sent. The receiver will then hear what you said in their selected language through their earphone.

Ending a Conversation

Tap the Red **“Hang Up”** button at any time to cancel or end a call.

To Exit Instant Translation Mode tap on **“<Back”** in the launch screen.

PRODUCT WARRANTY

Your new Supreme Voice Language Translator comes with a one-year limited warranty. Casa Innovations Group LLC will repair or replace this product if, due to defective parts or workmanship, it does not perform as specified. This warranty covers only repair or replacement of the product itself. This warranty is extended to the original consumer only. In no event does this warranty extend to instances where the product is damaged through uses for which it was not intended, misuse, mishandling, removal and/or reinstallation, neglect, accident or tampering. In no event shall Casa Innovations Group LLC be liable for any indirect, incidental or consequential damages, or loss of profits arising out of or related to this product, or the performance or breach thereof, even if Casa Innovations Group LLC has been advised of the possibility thereof.

Casa Innovations Group LLC liability to customer, if any, shall in no event exceed the total of the purchase price of the item. Some states do not permit the exclusion or limitation of incidental or consequential damages; therefore, sections of the above limitations or exclusions may not apply to you. This warranty is in lieu of any other warranty, expressed or implied, including, but not limited to, any warranty of merchantability or fitness for any particular purpose. Any representations or promises inconsistent, or in addition to this warranty are unauthorized and shall not be binding on Casa Innovations Group LLC.
