### 33 Lb. Portable Ice Maker
NS-IMP33SS9

#### PACKAGE CONTENTS
- Portable ice maker
- Ice basket (pre-installed)
- Ice shovel
- Quick Setup Guide

#### IMPORTANT SAFETY INFORMATION
- Read these instructions.
- Keep these instructions.
- Follow all instructions.
- Do not operate your ice maker with a damaged cord.
- Your ice maker requires a standard 110-120 volt, 60Hz electrical outlet with a three-pronged ground.
- Connect to a properly polarized outlet only. No other appliance should be plugged into the same outlet. Make sure that the plug is fully inserted into the outlet.
- Do not operate your ice maker with a damaged cord.
- Do not use any liquid besides water to make ice cubes.
- Place your ice-maker away from direct sunlight and make sure that there is at least 4 inches (10 cm) of space between the back and sides of your ice maker and the surrounding walls.
- Do not use your ice maker outdoors.
- Do not use your ice maker outdoors.
- Do not expose your ice maker to rain.
- Do not use your ice maker in a high-temperature environment.
- Do not use your ice maker near heat sources.
- Do not use your ice maker near water sources.
- Do not use your ice maker near flammable materials.

#### QUICK SETUP GUIDE

**SETTING UP YOUR ICE MAKER**

1. Place your ice maker on a level surface in a location where your ice maker is protected from direct sunlight and other sources of heat (such as, a stove, furnace, or radiator).
2. Make sure that there is at least 4 inches (10 cm) of space between the back and sides of your ice maker and the surrounding walls.
3. Clean the interior with diluted detergent, warm water, and a soft cloth, then rinse with clear water.
4. Take out the ice basket and clean it.
5. Unplug the water drain cap to remove all water.
6. Before using your ice maker for the first time, run 2-3 cycles of ice and dispose of them to help remove any plastic odor or residue from the manufacturing and shipping process.

**USING YOUR ICE MAKER FOR THE FIRST TIME**

**WARNINGS:**
- Your ice maker must be grounded. Do not defeat the safety purpose of the grounding-type plug. A grounding-type plug has two blades and a third grounding prong. The third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Before plugging in your ice maker, wait one hour for the refrigerant fluid to settle.
- Open the cover, remove the ice basket, then pour water into the reservoir. Make sure that the water level is below the level mark.
- Replace the ice basket, then close the cover.
- Plug the power cord into a grounded power outlet.
- Press the ON/OFF button.
- Press the SELECT button to select the ice cube size. If the room temperature is lower than 60°F (16°C), we recommend that you select the small or medium cube size to keep ice from sticking together.

**NOTES:**
- When the ice basket is full, your ice maker automatically stops making ice and the FULL ICE indicator lights.
- After ice is made and goes into the ice basket, the ice begins to melt. To save the ice, remove it from the basket and freeze it. Otherwise, the ice melts, the water goes back into the reservoir, and your ice maker loses the water to make ice again.
- The ice making cycle lasts 7 to 13 minutes, depending on the selected ice cube size and the ambient temperature. If the room is extremely hot, the cycle may take longer.
- While your ice maker is on, check the water level periodically. If water level is too low, your ice maker stops automatically and the ADD WATER indicator lights. Turn off your ice maker, then fill the reservoir to the level mark. Wait at least three minutes for the refrigerant liquid inside the compressor to settle, then turn on your ice maker.
- Change the water in the water reservoir every 24 hours to ensure a reasonable hygiene level.
- If your ice maker is not in use, drain all water left in the tank.

**FEATURES**
- Produces up to 33 lbs. (15 kg) of ice each day
- Stores up to 2.2 lbs. (1 kg) of ice
- Quick production cycle creates ice every 7-13 minutes
- Auto-detect prevents ice from overflowing when the basket is full
- Three ice cube sizes help create the perfect drink
- Removable ice basket gives you convenient access
- Water recycling system with reservoir lets you place your ice maker anywhere
- Quick production cycle creates ice every 7-13 minutes
- Stores up to 2.2 lbs. (1 kg) of ice
- Produces up to 33 lbs. (15 kg) of ice each day

**PACKAGE CONTENTS**
- Ice Maker
- Portable ice maker
- Ice basket (pre-installed)
- Ice scoop
- Ice shovel
- Water drain cap
- Ventilation opening

**ITEM**
- Ice scoop
- Ice shovel
- Ice basket
- Water drain cap
- Ventilation opening
- Ice cube size

**DESCRIPTION**
- Lift to remove ice.
- Moves ice into the ice basket.
- Holds ice.
- Provides cooling. Do not block.
- Moves ice into the ice basket.
- Use to remove ice from the basket.

**ITEM**
- ADD WATER indicator
- FULL ICE indicator
- SELECT button
- POWER indicator
- ON/OFF button

**DESCRIPTION**
- Lights when you need to add water.
- Lights when the ice basket is full.
- Lights to indicate the selected ice cube size.
- Press to select the ice cube size; L (large), M (medium), or S (small).
- Lights when your ice maker is turned on.
- Press to turn your ice maker on or off.
CLEANING AND MAINTENANCE

To clean your ice maker, follow the instructions in steps 3-5 in SETTING UP YOUR ICE MAKER.
- Clean the ice maker at least once a week or every three days if your water quality is poor.

CAUTION: Do not use bleach or vinegar to clean the internal components.

TIPS FOR SAVING ENERGY
- Locate your ice maker in the coolest area of the room, away from heat producing appliances or heating ducts.
- Make sure that your ice maker is sufficiently ventilated, with adequate air circulation behind it.

TROUBLESHOOTING

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>The ADD WATER indicator is on.</td>
<td>• Turn off your ice maker, open the cover, then remove the ice basket. Add water up to the water level mark. Replace the basket, then close the cover. Turn on your ice maker.</td>
</tr>
<tr>
<td>The FULL ICE indicator is on.</td>
<td>• Remove ice from the ice basket.</td>
</tr>
<tr>
<td>Ice cube stick together.</td>
<td>• The ice cycle is too long for the room temperature. Stop your ice maker, and restart it when the ice blocks melt. Select the small size ice cube selection.</td>
</tr>
<tr>
<td></td>
<td>• The water temperature may be too cold. Change the water in the inner tank. The best water temperature is between 45°F ~ 90°F (7°C ~ 32°C).</td>
</tr>
<tr>
<td>The ice making cycle is normal, but no ice is made.</td>
<td>• The room temperature or water temperature may be too high. The room temperature should be 50°F ~ 100°F (10°C ~ 40°C). The water temperature should be 45°F ~ 90°F (7°C ~ 32°C).</td>
</tr>
<tr>
<td></td>
<td>• The refrigerant liquid may have leaked. Contact a qualified service technician for repair.</td>
</tr>
<tr>
<td></td>
<td>• The pipe in the cooling system may be blocked. Contact a qualified service technician for repair.</td>
</tr>
<tr>
<td>The ice maker will not stop.</td>
<td>• Direct sunlight or sunlight reflection can cause the sensor to malfunction. Move your ice maker.</td>
</tr>
<tr>
<td>My ice maker is noisy.</td>
<td>• Your ice maker makes noise during the freezing cycle and when it is dumping ice. This is normal.</td>
</tr>
