

# NEW & IMPROVED

 PreSonus®

## Monitor Station v2 Desktop Studio Control Center

Equip your studio with pro monitoring features for a song with the newest version of our acclaimed Monitor Station.

Manage four audio sources (now including 44.1 / 48 / 88.2 / 96 kHz S/PDIF).  
Select between and control individual levels of three sets of monitor speakers.

Track using four powerful headphone amplifiers, each with Cue or Main input selection and individual volume controls.

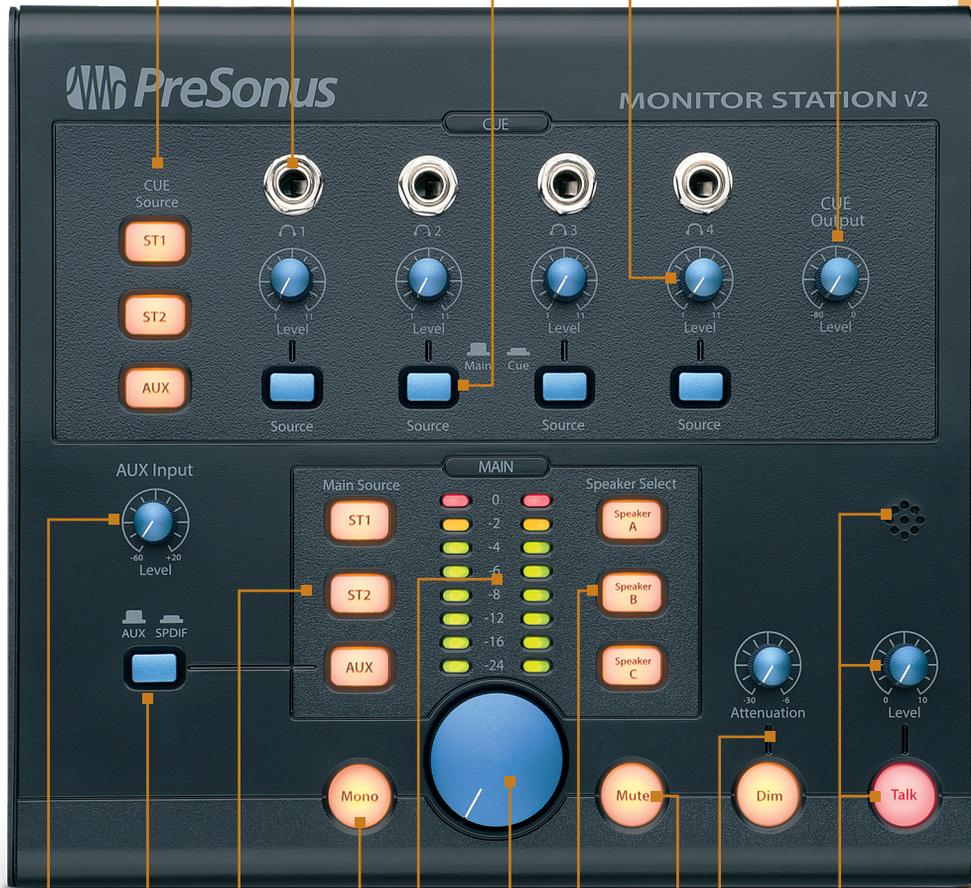

Even talk back to your drummer—all from a single compact control center.
