11-Speaker Sound System Upgrade for the 2022-Up Tesla Model 3

////ALPINE

## PRODUCT OVERVIEW

Unleash the full power and potential of your audio experience with the industry's first complete sound system kit designed to fit Tesla Model 3.

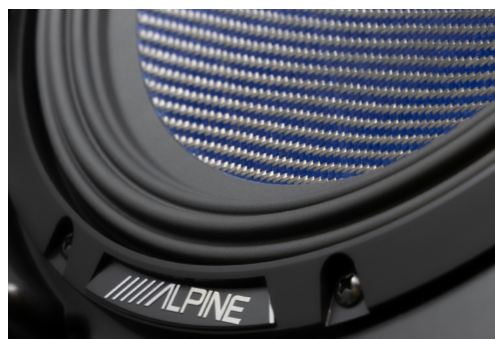

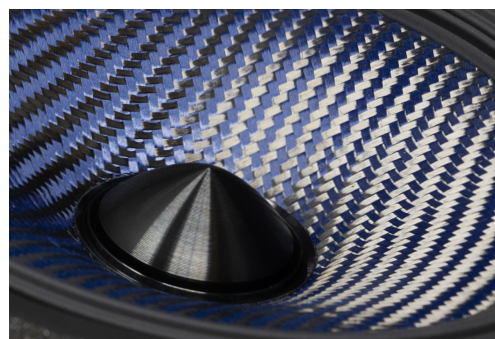

## PRODUCT FEATURES

**Designed to Fit Model 3** – Designed specifically to fit 2022-Up Tesla Model 3 with Factory Base Audio, the PSS-TSLA-223 is a complete plug-and-play sound system that boasts the perfect combination of power and efficiency. Designed with the Tesla driver in mind, this system elevates the performance of your sound system while maintaining the integrity of your interior.

**Seamless Integration** - Custom-designed for a stealth installation, this 11-speaker, complete sound system upgrade easily replaces the factory speakers with little to no cutting or modification required. A 10" sealed subwoofer is added in the rear trunk and provides a powerful boost of bass performance to the system.

**Hi-Res Audio** - Crafted from a unique hybrid blue carbon fiber material and paired with a cutting-edge ultra-efficient amplifier, the Hi-Res Audio certified speakers redefine your Tesla experience with unparalleled high-end sound performance. Every note is delivered with precision and clarity, creating a captivating atmosphere that truly elevates your journey.

**Tuned for the Tesla Cabin** – The included 12-channel Digital Sound Processor (DSP) comes pre-tuned for the unique interior environment of the Tesla Model 3, while the built-in 12-channel amplifier powers the full system with incredible efficiency. This ultra-efficient amplifier is optimized for EVs and uses less than one mile of range per hour when played at full volume.
