

# kangaroo

## Security for all.

Kangaroo introduces an accessible, customizable approach to smart home security.

### Motion Sensor

Kangaroo is your simple security system - all you need is the Motion Sensor, Wi-Fi, and our free security app. Our wireless Motion Sensor detects household disturbances and sends an alert directly to your phone or contacts emergency services. Users can manage security from their phone on our completely free plan, or choose a Kangaroo Complete plan to enable professional monitoring from a CL-Certified call center.

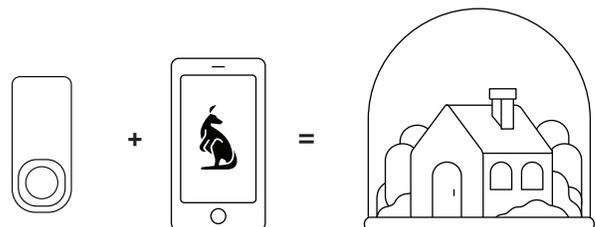

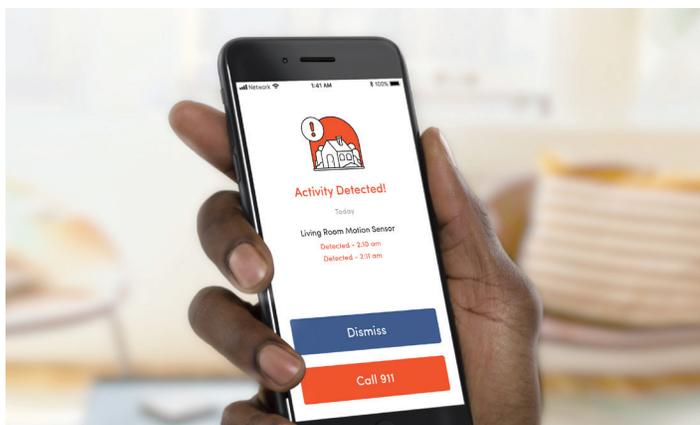

- **No hardhats or headaches.** Hub-free, wireless sensor is peel-and-stick simple.
- **Camera-free, microphone-free, worry free.** An essentials-only security system, Kangaroo has no camera, speaker or microphone, but will still alert you if it detects anything fishy.
- **Mobile-first security.** Motion Sensors are controlled entirely from Kangaroo's mobile app. Arm and Disarm, chat with friends, family and neighbors, or contact emergency services right from the app.

MSRP: \$30.00

### Features

- 120° field of view, detects motion up to 15 feet (4.6m) away
