## Introduction

The Panasonic Headphones RP HT161 K Full Sized Over the Ear Lightweight Long Corded compete with more expensive headphones thanks to their crystal-clear, high-quality sound and durable comfort. These headphones deliver pleasant midrange and treble registers for crystal-clear vocals and lyrics, coupled with powerful bass for music, movies, and gaming, and include dual 30mm neodymium driver units with 1000Mw maximum power input. The easy-adjust headband immediately moulds to your head for maximum comfort, while the soft, plush padded earpads wrap securely around your entire ear to isolate music and sound by blocking extraneous noise. With a generous 6.5 foot cord, you have the freedom to roam around when using music players, computers, and TV home entertainment components gaming. The RP HT161 K's sleek, matte black finish gives a distinctive look of style and comfort whether you're at home or on the go.

## What's in the box?

- Headphones
- User Manual

## Features

### Over-the-Ear Wireless Headphones

Full size, traditional design In order to maximise value and provide hours of enjoyable listening, headphones produce balanced, high-frequency sound comparable to more expensive headphones.

### Strong vocals, bass, and lyrics

For pleasant bass, as well as mid-range and treble for audible vocals and lyrics, dual 30 millimeter neodymium driver units can easily manage up to 1000Mw of maximum power input.

### Comfortable Padding

A smooth, quick-adjust headband readily adjusts to the head for the best possible fit and comfort, while plush padded earpads softly cover the entire ear to reduce background noise and distractions.

### Extra-Long Headphone Cable

You have plenty of room to recline and unwind while watching movies and TV with a 6.5 feet audio cord, and you have the ability to roam around while playing games.

### Sound and stylish

A clear appearance of style and comfort is added everywhere you go by the robust, lightweight construction and the sleek, distinctive matte black finish.

## Frequently Asked Questions

**Do they enclose the ears or press against them? I can't tell how big they are.**

With a center hole inside the padding of only about 1 & 3/4's inches around, these do not come close to enclosing my ears.

**Will these work well outside brisk walk or running with an iPod?**

We only use these on a computer, so I'm not sure how they'll function with movement. I can see them maybe working on a brisk walk, but they might be shaky for a run.

**I have severe hearing loss. Cannot hear video forwards at all on my HP laptop. Will these headphones**

### **help with this problem?**

Get a better phone some phones are crap I have hearing loss on buy my brain makes up the difference until it does not I crack the volume. Videos drawn data. Get away from people!!!! and background noise!

### **Is there an on/off button included with the in-cord volume control?**

There is no on and off button.

### **Are they comfortable? comfort is of prime concern. maybe i should just get in-ear so there is no pressure on my ears.**

If your head size is even a bit larger than medium, these will not fit comfortably. While they can adjust up and down, the over-the-head piece itself is a single rigid plastic piece with extremely little give. Also, the speakers will not fit comfortably over your ears unless your ears measure less than 1 3/4".

### **Will this work with my Kindle fire?**

The jack on these is cheap and may or may not work. They don't work with my IPOD, they do work with my son's IPOD, go figure.

### **Are the ear pad covers made of leather or something else?**

Seems to be something like parachute cloth Not leather, but nice and comfortable.

### **Will they fold up small enough to go into a shirt pocket?**

They really fold up into a compact package but not quite small enough for most pockets. Maybe baggy cargo pants.

### **Do they work in a portable cd player?**

The connector fits my computer and my phone so I assume yes

### **Microphone does it have one?**

It doesn't have a microphone

### **If this works with other devices Why does it say for iPod on the package?**

They work with any device that has a 3.5mm jack port.

### **Will they work for a galaxy note 3?**

This pair has a standard 3.5mm connector, so yes, they should work.

### **What is the length of cord?**

The cord on mine measures about 56 inches.

Sorry to have to ask this but what size plug does this use. Makes it easier to decide.

It is the small size that can be used on some phones. Not newer apple phones. Good for portable CD players and radios.

**Does this product have a plug in that is 3.5mm to use with a MacBook Air?**

The product has a generous 6.5-ft. audio cord that ends with a 3,5 mm universal plug.
