

FitDesk®
Under Desk
Elliptical

Add fitness to any desk and start improving your health today.

Meeting and exceeding daily fitness goals is easy with an active seating solution from FitDesk!

Do you spend a portion of your day sitting inactive? Do you wish you could get more activity and feel more alert without leaving your desk? Introducing the **FitDesk® Under Desk Elliptical**. Unlike most under desk peddlers, the **FitDesk® Under Desk Elliptical** uses a fluid forward and backward shuffle motion. The motion is found in elliptical machines. It creates a smooth motion for your legs while keeping your knees from hitting the bottom of your desk. Includes a desk stand for your digital meter so you can easily track your progress without looking under your desk. The foot-shifter allows for hands-free tension adjustments so you can stay focused on the task at hand.

Mounted Meter
For use on elliptical or
removes for desktop use

**Heavy Flywheel for
unmatched performance**
