Ledger **Nano S**

Simple. Incredibly Secure.

SECURE ELEMENT

Ledger Nano S is based on a dual chip architecture (ST31 CC EAL5+, STM32). The firmware integrity is guaranteed by cryptographic attestation.

MALWARE PROOF

Initialization or restoration of your private key is performed within the secure environment. Your private keys are never exposed to the outside world.

PIN CODE

A 4 to 8 digit PIN is required to unlock the Ledger Nano S every time you plug in the device, and is formatted after 3 wrong attempts.

PRIVACY

Your private keys are never held or known by Ledger or a third party: they are safely stored in the secure element.
