

Waterdrop

Replacement Filter Installation Instruction

Ultra Filtration Filter (UF)

Replacement for the following water filtration system:

Waterdrop Under Sink Ultra Filtration System.

Filter life: Up to 24 months (which may vary according to local water quality)

⚠ NOTE: Do not use with water that is microbiologically unsafe or of unknown water quality without adequate disinfection.

Getting Started

With the leak-free design, filters could be replaced directly without cutting off power and water. No additional tool is required.

1. Twist off the filter counterclockwise (**Figure 1**).
2. Remove the shrink wrap and protective cap from the new filter.
3. Insert the filter into the second hole, adjust the triangle mark to make it align with the empty circle on the front panel (**Figure 2**).
4. Push the filter into the hole with a certain pressure and rotate it a 1/4 turn clockwise, until the triangle mark is aligned with the solid circle on the front panel. You may hear a click when the filter is fitted properly (**Figure 3**).
5. Press and hold the UF filter life indicator for 5 seconds until the system beeps and the filter life indicator turns blue (**Figure 4**).
6. Turn on the faucet to flush for 10 minutes until UF filter life indicator changes from

Figure 1

flashing blue to long-time on.

NOTE: Normally, the filter life indicators are off and stay at the energy-saving mode. Please press any filter reset button to start up all the indicators when you want to check.

NOTE: You could refer to the following steps to change the filter

If it's hard to remove the old filter.

1. Turn off the feed water adapter.
2. Turn on the faucet to lease the pressure.
3. Turn off the faucet and remove the filter.

Storage and Maintenance:

- Replace the filter regularly according to the light of the filter life indicator.
- Do not store the filter for a long time, and place it in a dry, cool place when not in use.
- The water source needs to meet the requirements of municipal tap water.

Frequently Asked Questions:

Q: Why does filtered water taste weird ?

- A: (1) The filter is about to expire. Check the indicator reminder to confirm and replace it;
(2) The system hasn't been used for a long time. Turn on the faucet, and allow it to flush for a while before drink.

Q: What will happen if I do not change my filter when the filter life indicator turns red?

A: Over-used filter will degrade the filtration performance, causing contaminants to leak back into the water and adversely affect your health. It's recommended to replace the filter if the filter life indicator turns red.

Q: Why is the filter life indicator still red after changing filter?

A: Forget or fail to reset the filter life indicator. Please reset it again: press and hold the filter life indicator for 5 seconds until the system beeps and the blue light stays on.

⚠ Warning:

To reduce the risk of property damage due to water leakage, this filter MUST be installed in accordance with the manufacturer's specifications and instructions. Failure to follow instructions and operating specifications will void your warranty. Further, the manufacturer assumes no responsibility or liability for damages arising out of misuse of the product.
