Eve Weather

Connected Weather Station

Shop

Check your local outdoor temperature and humidity, and see the weather trend at a glance. With Eve Weather, enjoy intelligent weather monitoring seamlessly integrated into your daily life.

Monitor conditions on your doorstep.

Stay in or venture out? Wrap up warm or dust off your deckchair? Precision-engineered sensors measure temperature, humidity, and barometric pressure with unrivaled accuracy – keeping you up to date with current conditions, right on your doorstep.

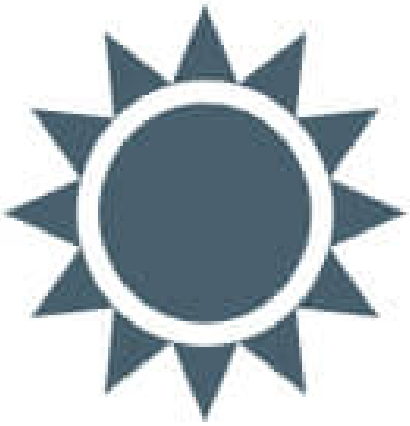
"Hey Siri..."

"...what's the temperature on the patio?" Ask your voice assistant what temperature's like outside, so you can dress for the day's weather before setting out.

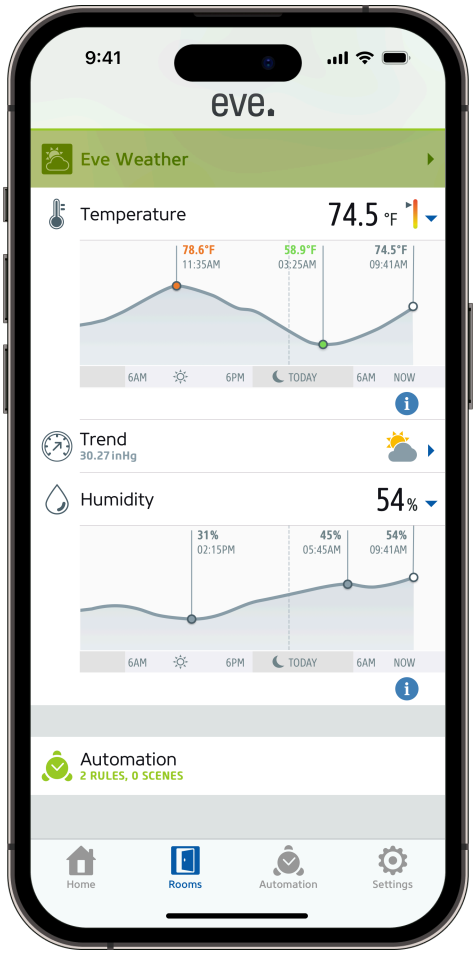
Know what the weather's going to do.

Eve Weather automatically analyzes local barometric pressure changes and uses this data to provide you with a 12-hour weather trend. Are the skies likely to clear? Or are they going to cloud over? You'll be able to tell at a glance just by looking at the icons on the display or in the Eve app for iPhone and iPad.



Track your home’s microclimate.

What's the coldest week of the year? How do humidity levels fluctuate throughout the day? Has low pressure prevailed since yesterday? The Eve app for iPhone and iPad records and visualizes weather conditions over time, empowering you with microclimate insights.



Embellish any place.

With its masterfully-crafted body and IPX4 water resistance, you can add a touch of functional elegance wherever it makes sense – from your patio wall or tabletop to your gazebo or garden nook.

23 °C

Automate other devices.

Eve Weather slots seamlessly into your connected ecosystem, enabling smart automations together with other Matter-enabled devices.

Say goodbye to being late.

Julia no longer is late in the morning. If the weather is frosty, she has her living-room lamp light up to remind her to leave earlier scraping ice off her windshield.

Protect plants – the really easy way.

For perfect cultivation conditions all year round, Eve Weather turns on Thomas's humidifier automatically when needed. And thanks to the insights he gained from past climate data, Thomas can easily see when he can move his delicate patio plants outside.

Future-proof with Matter.

Eve Weather is equipped with future-proof Matter technology, enabling you to connect it to additional platforms to let the whole family access your home easily and securely – no matter if they use an iPhone, Android device or call upon Alexa, Siri or Google Assistant

Always in reach.

Thanks to Thread-technology, reach Eve Weather in every corner of your garden. To extend its reach even further, simply position Eve Energy inside your home, closest to the Eve Weather outside.

Supported features by platform
