Bitdefender protects its users' privacy, as well as their devices.

Our award-winning security technologies protect against all cyber-threats today, from annoying adware to dangerous malware that infiltrates to steal data, intercept online payments, spy, or hold your information for ransom.

# Bitdefender®

Delivering The Best Cybersecurity In The World.<sup>1</sup> Our continuing mission: to keep our users safe from digital dangers, to create industry-leading technology, and do all that while being absolutely easy to use. We took our technology one step further: we made it smart and proactive. The best defense is to innovate.

Total protection for Windows

Unbeatable malware detection

Optimized performance preserves speed and battery life

Anti-ransomware keeps your files safe

## Network Threat Prevention

The new network-based adaptive layer of protection prevents exploitation of vulnerabilities in your system, detects and blocks brute-force attempts, prevents your device from being compromised in botnet attacks and prevents sensitive information from being sent in unencrypted forms.

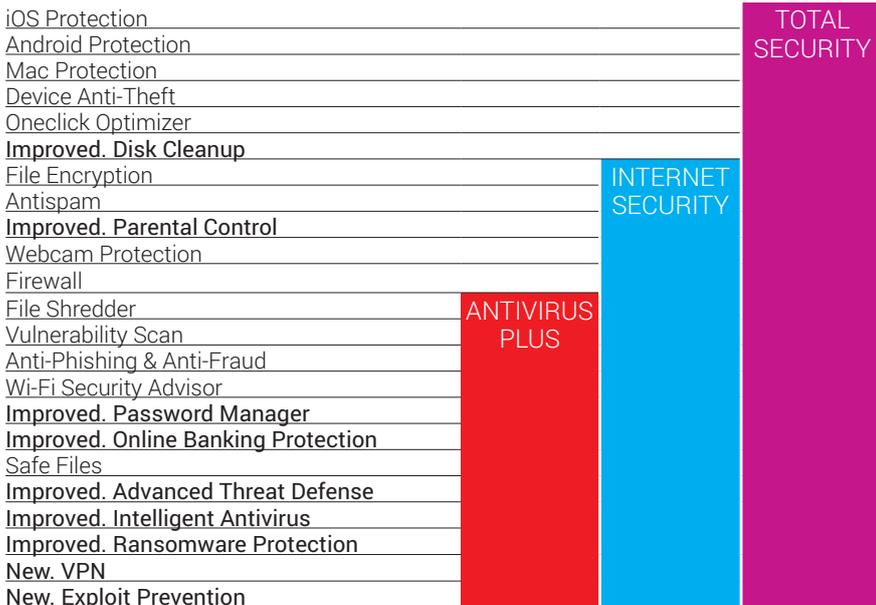

## Ransomware Remediation

The new Ransomware Remediation feature acts as a remediation layer which ensures that data such as documents, pictures, videos, or music will be protected against any kind of ransomware attack. In conjunction with the Advanced Threat Defense module, it protects your most important documents from encryption, so you can stop worrying about losing your data or money.
