USB Rocket Microphone

.....

Produces clear broadcast quality sound for podcasting, video conferencing, game streaming, YouTube productions and more.

Overview:

Aluratek's USB Rocket Microphone provides you with clear and professional sounding audio for podcasting, video conferencing, game streaming, YouTube productions and more. The microphone features a built-in studio grade pop filter that reduces background noise and distortion to ensure pure clean audio recordings. Choose between two different recording patterns, Cardioid (Unidirectional) and Omnidirectional by simply turning the knob on the front of the unit.

Features:

- Produces clear broadcast quality sound for podcasting, video conferencing, game streaming and more
- Two pickup patterns: Unidirectional and Omnidirectional
- Built-in studio grade pop filter that reduces background noise and distortion
- 3.5mm stereo headphone output for real-time monitoring without latency delays
- Metal base with non-slip feet keeps your mic standing firm to ensure pure audio recordings
- USB Plug-n-Play, no need to install drivers or software
- Compatible with Windows, Mac OS, iOS, Android and Chrome
- 1 Year warranty

Broadcast Quality Sound

Elevate the sound of your audio projects. The USB Microphone produces clear and crisp broadcast quality sound and features a built-in studio grade pop filter that reduces background noise and distortion. Great for podcasting, video conferencing, game streaming, YouTube productions and more.

Dual Pickup Patterns

Simply turn the knob on the unit to mute and choose one of two recording patterns.

Cardioid pattern: For use with broadcasting, game streaming, music recording and voice-overs. Records sound sources that are directly in front of the microphone.

Omnidirectional pattern: For use with multi-person podcasts and conference calls and recording live music performances. Records sound equality from all around the microphone.

USB Plug-n- Play

Get up and running quickly without having to install drivers or software. Simply connect the microphone to a USB port (USB cable included) on your PC or Mac computer to start recording live audio. Compatible with Windows, Mac OS, iOS, Android and Chrome.

Real-time Monitoring

The USB Microphone features a 3.5mm monitoring jack on the bottom of the mic. Simply plug in any 3.5mm corded headset which allows you to listen to what you are recording in real-time without latency delays.

Collapsible Base

The heavy metal base with non-slip feet keeps your mic standing firm to ensure your audio recordings are crisp and clean and free from unwanted noise and distortion. The base legs are collapsible which makes the mic easy to carry.

Package Contents:

- USB Rocket Microphone
- USB Cable
- Quick Start Guide

Specifications:

- Voltage: DV 5V
- Current: 150mA
- Sample Rate: 48kHz
- Bit Rate: 16bit
- Capsule Spec (2): 16mm Bi-directional professional electrode condenser capsule, 9.7mm omnidirectional electrode condenser capsule
- Frequency Response: 20Hz - 20 kHz
- Total Harmonic Distortion: 0.009%
- Sensitivity: 4.5mV / Pa (1K Hz)
- Audio Output: 130MW (32Ω)

Requirements:

Basic System Requirements:

- USB 2.0 port

OS Support:

- Win XP / 7 / 8 / 10
- Mac OS 10.1 or above
- Game Console PS3/PS4
- iOS *
- Android 4.0 and above *
- Chrome OS

* not for monitoring feature
