

BlackBerry® KEY2 LE

AN ICON FOR ALL

The Android-powered BlackBerry® KEY2 LE delivers a genuine BlackBerry smartphone experience purpose-built for everyday.

PURPOSEFUL DESIGN FOR THE MODERN COMMUNICATOR

Capturing the balance between iconic BlackBerry design and modern elements, BlackBerry KEY2 LE features a lightweight polycarbonate design and a newly designed soft textured back that provides better in-hand grip to prevent drops. It also includes a Full-HD, 2.5D display and will be available in three new color variations: Slate, Champagne and Atomic. In addition to a redesigned keyboard with keys that are nearly 10 percent larger than those found than BlackBerry KEYone, the KEY2 LE is the thinnest and lightest KEY series smartphone yet.

ENHANCED PRIVACY YOU CONTROL

Now you can take personal control of your smartphone privacy with features like Locker that allow you to manage what information is shared in the cloud, like your photos and documents. Locker provides a personal space on the device where you can store apps you want to keep private along with sensitive documents and photos. Firefox Focus, the privacy browser by Mozilla, is also included so you can avoid trackers and automatically delete your browsing session when the app is closed.

PRODUCTIVITY YOU CAN ONLY FIND IN A BLACKBERRY SMARTPHONE

With BlackBerry KEY2 LE, you have all the features you need to manage your work, travel, and personal life on the go. This includes support for dual personal accounts and business ready software that makes it easier to manage all aspects of your life. The built-in dual account management enables you to separately manage both personal and professional social media profiles on apps like Facebook and Instagram, and it also comes loaded with BlackBerry Hub which pulls all your messages together into one consolidated place for easy viewing.

POWER TO GET YOU THROUGH THE DAY

Powered by a Qualcomm® Snapdragon™ processor and an efficient battery that offers up to 22 hours of mixed use to get you through the busiest of days and often into the next day. In addition, the KEY2 LE features Qualcomm® Quick Charge™ 3.0, enabling up to a 50 percent charge in about 36 minutes – enough power to get you through a normal work day. The KEY2 LE also has Boost Mode charging and contextual battery reminder which learns your daily charging habits and calendar appointments to recommend when to charge so you have the battery need when you need it.

DESIGN

Dimensions	150.25 x 71.8 x 8.35mm
