- MI-7929 can support 20 pounds and has a spacious tabletop measuring 32" x 22"
- Collapses to as low as 2.5" and raises up to 16.9"
- Transition from sitting to standing quickly with a simple pull of a handle
- The X-lift base design allows this table top standing desk to raise or lower straight up and down, providing more stability and saving space
- Affordable way to improve your home or office work ergonomics

OVERVIEW

This sit-stand desk converter elevates your computer or laptop to a comfortable height for an improved viewing experience and better posture. The spacious tabletop on this converter supports a monitor and a laptop or tablet. Moving from sitting to standing can be done in a matter of seconds thanks to the spring mechanism built into this design. Simply squeeze the lever on the side of the desk, and the desk will raise and lower in a smooth, fluid motion. Ready to use right out of the box.
