

VTL17IR

Concealed Mount License Plate Camera with Night Vision

1. Bill of Material

2. Specifications

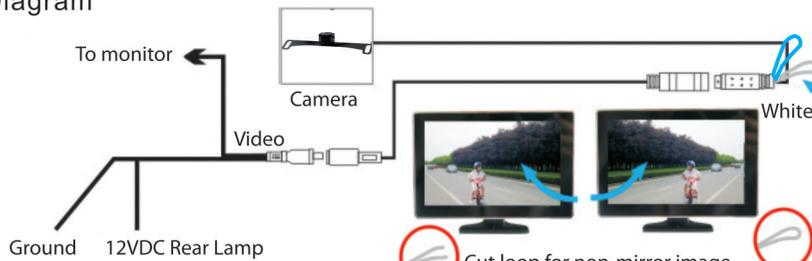

- * Concealed Mount license Plate Camera With Night Vision
- * 600 TVL Horizontal resolution
- * Excellent Auto White Balance
- * Reverse/Non-Reverse image selectable
- * Parking Line on/off Selectable
- * 170 degrees wide viewing angle

3. Installation Tips

- 3-1. VTL17IR is designed to work best on vehicles that have a license plate located at the center and above the rear bumper. If your vehicle has a plate located that is offset to the left side, right side or your plate is located under the bumper then the VTL17IR may not provide optimum performance.
- 3-2. VTL17IR bar-bracket is designed to be mounted behind the license plate so that only the camera is visible.
- 3-3. VTL17IR is designed to use the existing License Plate mounting equipment.

4. Dimensions (Inches) & wiring

Installation Diagram

If using the camera as front camera, cut the white loop to get non-mirror image.

If using the camera as rear view camera, do not cut the white loop.

If you don't need parking line, cut the blue loop

If you need parking line, do not cut the blue loop
