Work with your own studio for audio production

With **Sound Forge Audio Studio** you have the ideal tool for recording, editing and optimizing music and sound. Digitize, repair or restore rare edition LPs and tapes and create your own podcasts and karaoke tracks. Record music and sound from almost any source with **Sound Forge Audio Studio** by simply connecting a microphone or instrument directly to the sound card output. Classic Sound Forge tools and plug-ins are included in the software, enabling you to achieve high-quality acoustics for your tracks and burn them to CD if you want. You can also convert new files to popular formats in studio quality for virtually all playback devices.

Highlights:

- Powerful recording and editing tools for professional sound recordings with resolutions of up to 24 bit/192 kHz
- Advanced tools for recording and restoring vinyl records
- Modify audio files with more than 30 integrated audio effects and plug-ins
- Integrated function for creating layouts and burning CDs for individual tracks or in Disc At Once mode

System requirements

Compatible with:

Microsoft Windows XP (Service Pack 3 or higher), Windows Vista (Service Pack 2 or higher), Windows 7, Windows 8, Windows 8.1, or Windows 10

All MAGIX programs are developed with user-friendliness in mind so that all the basic features run smoothly and can be fully controlled, even on low-performance computers. The technical data for your computer can be found in the control panel of your operating system.

Processor: 1 GHz

RAM: 512 MB RAM

Hard disk space: 350 MB disk space for program installation

Graphics card: Onboard

Sound card: Onboard

Internet connection: Online registration required for software activation.
