1. Case Assembly

Slide the front bezel into the back panel and connect the bezel to the front panel. Push the bezel into the back panel and the bezel will snap into place. (See Fig. 1.)

2. Assembling the Legs

Slide the legs into the back panel. Push the legs into the back panel and the legs will snap into place. (See Fig. 2.)

Slide the front panel into the back panel.

Assembly (continued)

3 Side Panel Assembly

- 1. Attach the side panel to the main frame using the screws provided.
- 2. Tighten the screws evenly across the panel.

4 Assembling Side Panels with Wire

- 1. Lay the side panel on the main frame with the wire mesh facing outwards.
- 2. Attach the side panel to the main frame using the screws provided.

Assembly (continued)

5 Back Panel Assembly

1. Insert 4x4 screws (provided) into top front & bottom 2x holes from inside panel.
2. Tighten screws to hold in place.

6 Assembling the Control Panel

1. Insert 4x4 screws (provided) into top front & bottom 2x holes from inside panel.
2. Tighten screws to hold in place.

7 Assembling the Gas Tank Support

- 1. Attach the support legs to the base of the tank using the screws provided.
- 2. Attach the support legs to the base of the tank using the screws provided.

8 Assembling the Cylinder

- 1. Fit the cylinder on the Gas Support. Use the screws provided to secure the cylinder to the Gas Support.

Use the screws provided to secure the cylinder to the Gas Support. Do not use any other screws.

Reasonably (continued)

9 Assembling the Lava Floor

- 1. Assemble the Lava Floor (see instructions for Lava Floor in the Appendix).

10 Installing the JVA Battery

- 1. Locate the battery compartment (see Figure 10-1) and remove the cover.
- 2. Insert the JVA battery into the compartment and secure the cover.
- 3. Mount the battery in the cabinet.

Operating (continued)

SAFETY PRECAUTIONS

1. Do not use the saw on any material that is not designed for use with this saw.

2. Do not use the saw on any material that is not designed for use with this saw. Do not use the saw on any material that is not designed for use with this saw. Do not use the saw on any material that is not designed for use with this saw.

Fig. 11-1

1. The saw is not designed to cut any material that is not designed for use with this saw.
2. Do not use the saw on any material that is not designed for use with this saw.
3. Do not use the saw on any material that is not designed for use with this saw.
4. Do not use the saw on any material that is not designed for use with this saw.
5. Do not use the saw on any material that is not designed for use with this saw.

Always apply the correct amount of force

1. Do not use the saw on any material that is not designed for use with this saw.
2. Do not use the saw on any material that is not designed for use with this saw.
3. Do not use the saw on any material that is not designed for use with this saw.

Maintenance

Storage and use

2.7.12 The units must be stored as follows:

1. upright
2. not fully open (to avoid permanent damage to the motor) and not fully closed (to avoid damage to the fan)
3. The units must not be stored in a location where they will be exposed to rain.

 **Always use the correct storage location.**

Locating parts of a mechanically altered unit

1. See the unit's user manual.
2. Diagrams of components are shown in the user manual. If you have any questions, contact us.
3. Electrical parts are shown in the user manual. Do not touch electrical parts.
4. To find the C-C gap, see the user manual. Do not touch the fan blades.

 **Always use the correct storage location.**

Care and Cleaning

2.7.13 Always use the correct care and cleaning instructions to avoid damage to the unit. Always read the user manual for more information.

1. Always use the correct care and cleaning instructions to avoid damage to the unit's joints.
2. Do not use the unit.
3. Do not use the unit in a location where it will be exposed to rain or snow.
4. Do not use the unit in a location where it will be exposed to high humidity or high temperatures.
5. Do not use the unit in a location where it will be exposed to high salt or high acid levels.
6. Do not use the unit in a location where it will be exposed to high dust or high dirt levels.
7. Do not use the unit in a location where it will be exposed to high vibration.
8. Do not use the unit in a location where it will be exposed to high noise levels.
9. Do not use the unit in a location where it will be exposed to high electromagnetic interference.
10. Do not use the unit in a location where it will be exposed to high radio frequency interference.
11. Do not use the unit in a location where it will be exposed to high magnetic fields.
12. Do not use the unit in a location where it will be exposed to high electric fields.
13. Do not use the unit in a location where it will be exposed to high magnetic fields.
14. Do not use the unit in a location where it will be exposed to high electric fields.
15. Do not use the unit in a location where it will be exposed to high magnetic fields.
16. Do not use the unit in a location where it will be exposed to high electric fields.
17. Do not use the unit in a location where it will be exposed to high magnetic fields.
18. Do not use the unit in a location where it will be exposed to high electric fields.
19. Do not use the unit in a location where it will be exposed to high magnetic fields.
20. Do not use the unit in a location where it will be exposed to high electric fields.

Food and Wine

QUESTION	ANSWER	EXPLANATION
What is the most common food allergy?	Peanuts and tree nuts	These are the most common food allergies. They are also the most dangerous because they can cause anaphylaxis.
