- Award winning hardware and technology:

 **THONET & VANDER**[®]

THONET & VANDER® Hub

What is the THONET & VANDER® Hub?

The **T&V-Hub** is the world's first Bluetooth router that uses a new technology to redefine what's possible with Bluetooth. For example, with the hub you can stay connected with a Bluetooth speaker even if you move your phone into another room, or move your speakers to your backyard.

What is T&V BlueStream?

This patent-pending feature lets users stream music from any app – Spotify, Pandora, iTunes, etc. – to multiple Bluetooth speakers throughout their home or office, simply by connecting to the **T&V Hub** as if it were any other Bluetooth speaker. Users can stream from any audio sources including smartphones, tablets, computers, and more.
