Performance

FEATURES

Removable Antenna

A variety of antenna options help you optimize your range and radio power

Rugged Durability

Durable, lightweight, and ready for the outdoors with IPX2 dust and water resistant construction

Reliable Battery Life

Recharge the included rechargeable NiMH AA batteries with any USB-C charging cable for 12 hours of operation

Repeater Capability

Repeaters act as relay stations that can receive radio signals and transmit them again at a higher power level--extending signal coverage significantly

Programming Software

User-friendly and intuitive programming software allows you to customize your radio from your computer. *The programming cable is sold separately; not needed for the product.
